Kris Weldy

Special appreciation is given to all fiscal and accounting personnel throughout the State whose extra efforts to contribute accurate, timely financial data for their agencies made this report possible.

Featured on the cover: On March 1, 2003, the State of Ohio will celebrate its 200th birthday. To commemorate Ohio's Bicentennial, a barn was selected from each of Ohio's 88 counties to display a painted version of Ohio's Bicentennial logo. The front cover features a photograph of Delaware County's Bicentennial Barn, which was provided by Joe Murray of Chillicothe, Ohio. Information about Ohio's Bicentennial can be found by visiting the Ohio Bicentennial Commission's website at www.ohio200.com.

INTRODUCTORY SECTION

January 28, 2003

To the Governor, the Honorable Members of the General Assembly, and the Citizens of Ohio:

It is my privilege to issue the *Ohio Comprehensive Annual Financial Report* (CAFR) on the financial condition of the State of Ohio for the fiscal year ended June 30, 2002. The report is prepared in conformity with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).

The Ohio Office of Budget and Management pursuant to Section 126.21, Ohio Revised Code, which requires that an official financial report of the State be issued annually, prepared this report. The report includes the basic financial statements, which provide an overview of the State's financial position and the results of financial operations.

The Office of Budget and Management is responsible for the accuracy of the data presented and the completeness and fairness of its presentation, including all disclosures. To the best of our knowledge and belief, the enclosed data are accurate in all material respects and are reported in a manner designed to present fairly the financial position and results of operations of the State of Ohio. All disclosures necessary to enable the reader to gain an understanding of the State's financial activities have been included.

The State's basic financial statements include all funds that comprise the State's legal entity or primary government. The State's reporting entity is also comprised of its component units for which the elected officials of the State's primary government are financially accountable. We followed the criteria of GASB Statement No. 14, *The Financial Reporting Entity*, to determine the organizations for which the State is financially accountable. NOTE 1A. to the financial statements explains more fully which financial activities are included in the State's reporting entity.

The CAFR includes the following: introductory section; financial section that presents the management's discussion and analysis (MD&A), basic financial statements, required supplementary information, combining financial statements, supporting schedules, and fund descriptions; and a statistical section that presents financial, economic, and demographic data for Ohio.

The MD&A, which is required under GAAP to accompany the basic financial statements, provides a narrative, introduction, overview, and analysis.

The reporting format for our CAFR is significantly different from the way the State more typically presents its finances on a non-GAAP budgetary basis. The most obvious difference is that the "General Fund" in the CAFR includes more than just the State's General Revenue Fund (GRF). The General Fund also includes other funds such as the reimbursement-supported funds used for activities administered by state agencies and departments for which special revenue or proprietary fund classifications were considered to be inappropriate.

INDEPENDENT AUDIT RESULTS

The basic financial statements have been audited by the Office of the Auditor of State. The outcome of the audit conducted by the Auditor of State, in accordance with generally accepted auditing standards, was an unqualified auditors' report. This opinion indicates there was no limitation on the scope of the auditors' examination and the financial statements were presented fairly, in all material respects, in conformity with GAAP.

PROFILE OF THE GOVERNMENT

The State of Ohio's first constitution was adopted in 1802, and Ohio entered the union in 1803. Ohio's present constitution was modified by a state constitutional convention in 1851 and has since been amended on numerous occasions. The Constitution establishes a state governmental structure similar to the federal model, with three separate branches of government — executive, legislative, and judicial.

The executive branch consists of the Governor and Lieutenant Governor, who are jointly elected, and four additional statewide elected officials: the Attorney General, the Auditor of State, the Secretary of State, and the Treasurer of State. All of these officials are elected to four-year terms. More than 100 departments, agencies, boards, and commissions are part of the executive branch of government and receive appropriations from the legislature, along with three judicial and five legislative agencies. An organizational chart of state government can be found on page 12.

The state legislature in Ohio is referred to as the General Assembly and consists of two separate chambers, the Senate, a 33-member body, and the House of Representatives, a 99-member body. Each member of the General Assembly is elected to represent the residents of a geographical district for a specified term. Members of Ohio's General Assembly are subject to term-limits; senators are re-

stricted to serving two four-year terms, and representatives are restricted to serving four two-year terms. Each chamber has a presiding officer to call the chamber to order and direct the calendar of events. The presiding officer in the Senate is the President of the Senate, and the presiding officer of the House of Representatives is the Speaker of the House. A new General Assembly is convened in January of each odd-numbered year.

Along with the establishment of our state governmental structure, the Constitution requires Ohio to have a balanced budget. Ohio's budget is prepared for a period of two years – a biennium –, which begins on July 1 of odd-numbered years and ends 24 months later on June 30.

The State provides a wide range of services and support to its citizenry that are accounted for in the following functions or programs: primary, secondary and other education, higher education support, public assistance and Medicaid, health and human services, justice and public protection, environmental protection and natural resources, transportation, general government, community and economic development, workers' compensation, lottery, unemployment compensation, tuition credits, liquor control, and other business-type activities.

ACCOUNTING SYSTEM AND BUDGETARY CONTROL

The State's management is responsible for establishing and maintaining internal control designed to ensure that the State's assets are protected from loss, theft, or misuse and to ensure that adequate accounting data are compiled to allow for the preparation of financial statements in conformity with GAAP. Internal control is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: 1) the cost of a control should not exceed the benefits likely to be derived, and 2) the valuation of costs and benefits requires estimates and judgments by management.

In fiscal year 1992, an executive order initiated the Internal Accounting Control Program (IACP). The IACP establishes written guidelines for state agencies to follow during periodic management reviews of their accounting operations. Under the program, agencies are required to formally establish, maintain, and annually evaluate and report on internal accounting control.

The State's Central Accounting System (CAS) achieves budgetary control over the various accounts of the State's funds. The General Assembly, authorizes expenditures by appropriating funds in biennial and supplemental appropriation acts. The Office of Budget and Management uses the CAS to control departmental obligation and expenditure activity to ensure authorized appropriations are not exceeded.

The State's non-GAAP budgetary financial statements are prepared on a modified cash basis of accounting. This means that revenues are recognized when cash is received and expenditures are recognized when cash is paid. Encumbrances, reservations of appropriation authority as of June 30, the end of the State fiscal year, are reflected as expenditures on the budgetary basis of accounting.

Budget-to-actual comparisons can be found in this report for each governmental fund for which an appropriated annual budget has been adopted. For the General Fund and major special revenue funds, these comparisons are presented as part of the basic financial statements. For other budgeted governmental funds with appropriated annual budgets, budget-to-actual comparisons are in the nonmajor governmental funds section of the CAFR.

Additional discussion of the budgetary and GAAP bases of accounting is provided in NOTE 1 to the financial statements.

The CAS maintains all non-GAAP budgetary basis transactions and most GAAP basis adjustments. In addition to the information obtained from the CAS for financial reporting, selected financial information provided by the State's agencies and departments is compiled to complete the GAAP basis financial statements.

Differences between the two bases of accounting (GAAP vs. non-GAAP budgetary) include: 1) entity differences — the GAAP reporting entity may include organizations such as financing authorities and other component units that are not included in the State's budget; 2) basis differences — the GAAP basis results in the reporting of accruals while the non-GAAP budgetary basis results in the reporting of cash transactions; and 3) timing differences — for example, GAAP recognizes expenditures for payables for goods and services received, whereas the non-GAAP budgetary basis considers unliquidated encumbrances as expenditures. A reconciliation between the GAAP basis and non-GAAP budgetary basis fund balances is presented in NOTE 3 to the financial statements.

CASH MANAGEMENT

In Ohio, with the exception of certain organizations within the State's reporting entity that have independent powers to manage and invest their funds, the Treasurer of State is responsible for investing the State's cash and investments pool. During fiscal year 2002, cash management and investment transactions made by the Treasurer of State's Office, in accordance with the Uniform Depository Act, were limited to checking accounts and certificates of deposit with qualified public depositories, U.S. government and agency obligations, commercial paper, repurchase agreements, bankers' acceptances, bonds of foreign nations diplomatically recognized by the United States, and security lending agree-

ments. Legal requirements for the investment of funds maintained in the State's cash and investments pool are discussed in NOTE 4 to the financial statements.

Quarterly, the Office of Budget and Management allocates the investment income earned on the cash and investments pool to the various funds designated by law to receive the earnings. The allocation is calculated in accordance with a formula based on average daily cash balances invested over the quarter. The Ohio Lottery Commission's investment portfolio, which is dedicated to the payment of deferred lottery prizes and is accounted for as part of the cash and investments pool, however, is not part of the investment earnings allocation just described. Instead, the Treasurer of State credits the investment earnings from the dedicated portfolio directly to the credit of the fund that accounts for this activity.

RETIREMENT SYSTEMS

Employees of the primary government or its component units may be eligible to participate in the Ohio Public Employees Retirement System, the State Teachers Retirement System of Ohio, the State Highway Patrol Retirement System, or the Alternative Retirement Plan. Further information on the State's participation in the different retirement systems can be found in NOTE 9 to the financial statements.

RISK MANAGEMENT

As discussed in NOTE 10. to the financial statements, the State's primary government is self-insured for claims under its traditional healthcare plan (OhioMed Health Plan) and for vehicle liability while it has placed public official fidelity bonding with a private insurer. The State self-funds tort liability and most property losses on a pay-as-you-go basis; however, selected state agencies have acquired private insurance for their property losses. Also, the State's primary government and its component units participate in a public entity risk pool, which is accounted for in the Bureau of Workers' Compensation Enterprise Fund, for the financing of their workers' compensation liability.

ECONOMIC OVERVIEW AND OUTLOOK

After several quarters of sub-par growth, the U.S. economy is slowly recovering. However, the current recovery is expected to be a "jobless recovery," similar to the 1991-1992 economic expansion. Expansionary fiscal and monetary policies will spur economic growth for the short-term, but with foreign economies weak and capital spending rising only moderately, the current recovery cannot gain momentum.

Consumer spending, which constitutes about two-thirds of the economic activity in the U.S., continues to be the main driver of economic growth. Consumers rarely retrench, but when jobs are scarce and debts are high, as is the case now, the rate of growth in consumer spending slows. Consumers

are stretched about as far as they can go, taking on large amounts of debt in the process. Debt-service payments are claiming a record share of disposable income despite the drop in interest rates. For the recovery to experience solid growth, investment spending and capital outlays must be revived.

The financial markets continue to reflect a combination of worries over the strength of the recovery, the war in the Middle East, and lack of confidence in the numbers that are released from corporate income statements. Even if the stock market has already hit bottom, the climb from the hole is expected to be very slow and gradual. Investors will once again demand a substantial risk premium on stocks and the temptation of profit taking to recover losses will keep a lid on the price of equities.

The forecast for inflation calls for moderate growth at the consumer level. Outside of the volatile food and energy component, producer prices for finished goods are rising at less than 0.5 percent a year. Core consumer prices are rising a bit faster because of the heavy weighting of services. But even with services, inflation as measured by the Consumer Price Index is predicted to increase about 2.0 to 2.5 percent a year.

The economic outlook for the State of Ohio is consistent with the forecast of slow and moderate growth at the national level. Real Gross Domestic Product, the total value of goods and services produced in the U.S. and adjusted for inflation, is expected to grow in the range of 2.5 to 3.5 percent annually over the next three years.

MAJOR INITIATIVES AND PROJECTS

The State Operating Budget

Due to the national economic slowdown, Ohio experienced its most serious budget crisis in a decade. As part of a balanced approach to this crisis, Governor Taft ordered six-percent cuts to most state agencies in fiscal year 2002. These cuts came on top of the \$181 million in cuts mandated in the previous fiscal year and another \$600 million in proposed state agency spending that was redirected from agencies to a school funding solution during the last biennial budget development process. To begin fiscal year 2003, Governor Taft issued even more cuts – 15 percent for most state agencies. Later, on January 22, 2003, the Governor ordered additional budget cuts of 2.5 percent. Overall, Ohio's state agencies have experienced significant budget cuts in the past two years. The challenge continues to be providing essential state services in an efficient, effective and cost conscious manner.

Primary and Secondary Education

Governor Taft's highest priority is enabling every child to succeed. This is reflected in the fiscal year 2002-2003 budget in which 62.7 percent of all new GRF dollars are used to support education at all lev-

els and the implementation of a new school funding formula that guarantees that every school child in Ohio has access to the resources necessary for a quality education. State appropriations for primary and secondary education totaled \$7.4 billion in fiscal year 2002 (an eight-percent increase over fiscal year 2001) and \$7.8 billion in fiscal year 2003 (a five-percent increase over fiscal year 2002). Pursuant to the new school funding formula, per pupil spending increased to \$4,814 in 2002 (an increase of 12.1 percent over fiscal year 2001) and \$4,949 in 2003 (an increase of 2.8 percent over fiscal year 2002). Under the current plan, per pupil spending will rise to \$5,527 by fiscal year 2007. The funding model is based on successful 1999 local school districts and removes those districts that fall within the top and bottom five percent of districts with regard to income and property wealth.

As an outgrowth of legislation enacted in June 2001, the state has begun to develop and implement policies and programs to address academic standards and student assessment; to improve student learning; and to establish school accountability. In fiscal year 2002, the State Board of Education adopted language arts and mathematics standards; curriculum models in these two subject areas are under development and social studies and science standards are slated for completion at the end of this year. Additionally, in fiscal year 2002, the State appropriated \$23.7 million for the administration of 4th, 6th, and 9th grade proficiency tests and the development of new federally required achievement, graduation and diagnostic tests. The fiscal year 2002 budget also supported \$31.9 million for student intervention services and \$4.5 million for the development and distribution of school report cards.

Other areas supported by FY 2002 appropriations include:

- \$99.8 million of parity aid that provides funding for low-wealth school districts;
- \$360.1 million to support disadvantaged pupil impact aid for economically disadvantaged children;
- \$339.2 million for special education; and
- \$45.9 million to support gifted units and the identification of gifted children.

Primary and Secondary Education — Ohio Supreme Court Case Update

Litigation, similar to that in other states, has been pending in Ohio courts since 1991 questioning the constitutionality of Ohio's system of school funding and compliance with the constitutional requirement that the State provide a "thorough and efficient system of common schools." On December 11, 2002, the Ohio Supreme Court, in a 4-3 decision on a motion to reconsider its own decision rendered in September 2001, concluded (as it had in its 1997 and

2000 opinions in that litigation) that the State did not comply with that requirement, even after again noting and crediting the significant steps it had taken in recent years. The Court directed the General Assembly "to enact a school-funding scheme that is thorough and efficient" — as explained in its prior decisions and accompanying concurrences — dismissed the case, and relinquished any further oversight of it.

It is not possible at this time to state what or when the General Assembly's further responses will be, or what effect they or any related actions may have on the State's overall financial condition (particularly in the current biennium) or on specific state operations.

Rebuilding Ohio's Schools

Governor Taft, through the Rebuild Ohio Plan, has proposed spending over \$10.2 billion in state funding, matched by \$12.9 billion in local funding, in a 12-year plan to address the facility needs of all Ohio school districts. The plan will allow every Ohio school child to learn in safe, modern facilities and give school districts the capability to create customized classrooms and instruction tailored to meet students' needs. The School Facilities Commission (SFC), charged with providing funding to public school districts and overseeing the construction and renovation of school facilities, has disbursed over \$2.5 billion, and spends over \$2 million a day. SFC currently administers school facility projects in 130 districts with over 300 buildings at a value of over \$4 billion in design, construction, or completion. At the end of calendar year 2001, SFC had completed 21 district-wide projects and finished the construction or renovation of 60 buildings. By the end of calendar year 2002, SFC estimates it will complete an additional 23 district-wide projects and an additional 83 buildings.

A major undertaking in fiscal year 2002 was the creation of the Accelerated Urban Assistance Initiative. The SFC conducted facility assessments and developed master facility plans to modernize Ohio's largest urban schools including Akron City, Dayton City, Columbus City, Cincinnati City, Cleveland Municipal and Toledo City schools. These school districts, which include over 500 buildings, house approximately 16 percent of Ohio's student population. The total projected cost for the six plans is \$5.74 billion, of which \$2.95 billion will be paid by the State. Funding for the construction portion of the program will begin in fiscal year 2003.

No other state in the nation has adopted such a comprehensive and ambitious building program. In fact, during the five years that SFC has been in existence (since May 1997), Ohio has appropriated nearly 20 percent more for school facility programs than the neighboring states of Michigan, Indiana, Pennsylvania, Kentucky, and West Virginia combined.

Third Frontier Project

The Third Frontier Project is the state's largest commitment ever to expanding Ohio's high-tech research capabilities and promoting start-up companies to build high-wage jobs for generations to come. The Third Frontier Project will make Ohio a leader in high-tech, high-paying jobs by

- Committing \$500 million over the next 10 years through the Technology Action Fund and the Biomedical Research and Technology Transfer Fund.
- Proposing a new, ten-year, \$500 million capital improvement program to improve research facilities. These funds will finance buildings and provide equipment for globally competitive centers of innovation that will be named after the Wright Brothers.
- Initiating a \$500 million bond program to provide much-needed resources to recruit world-class researchers and bring state-of-the-art products to market.
- Creating a \$100 million Innovation Ohio Fund to help finance targeted industries with high-growth, high-wage potential consistent with regional priorities. The fund will support advanced manufacturing technologies to help existing industries become more productive, competitive and profitable.

Through the Third Frontier Project, federal and private sector support could boost the total investment to more than \$6 billion, and make Ohio a leader in high-tech, high-wage jobs over the next decade.

Ohio Homeland Security

In response to the terrorist attacks of September 11, 2001, Governor Taft established the State of Ohio Security Task Force to develop a coordinated, comprehensive strategy to address security issues. The Task Force is organized into committees covering law enforcement, transportation security, technology research and development, medical and health preparedness, emergency preparedness, and funding and legislation. The Task Force shares information and discusses time-sensitive issues affecting Ohio and works proactively to enhance the state's security efforts. The Ohio Security Task Force has worked with federal, county and local Emergency Management Agency (EMA) officials, law enforcement and other agencies to complete a three-year domestic preparedness assessment, making it possible for Ohio to qualify for additional federal dollars to support security efforts across the state.

In September 2002, the U.S. Department of Justice approved Ohio's plan to allocate \$9.9 million in federal homeland security funds among Ohio's 88 counties and five state agencies. Ohio's share of

this national program is seventh largest among the country's states and territories and will be used to help finance local homeland security drills and exercises and purchase emergency response equipment as determined by comprehensive ongoing threat, risk and needs assessments from each county. In addition, federal funds will support:

- The State Fire Marshal to purchase first responder supplies and equipment;
- The Ohio Department of Agriculture to buy testing and verification equipment for its laboratory; and
- The Ohio EMA to purchase trailers stocked with medical items for first responders.

CERTIFICATE OF ACHIEVEMENT

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Ohio for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2001. This was the 12th consecutive year that the State has achieved this prestigious award.

To be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized CAFR. The CAFR must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to GFOA to determine its eligibility for another certificate.

ADDITIONAL INFORMATION

The Ohio Office of Budget and Management provides access to the fiscal year 2002 *Ohio Comprehensive Annual Financial Report*, fiscal year 2002 *Ohio Budgetary Financial Report*, and other State-related financial data and information on the Internet at <http://www.state.oh.us/obm/>.

ACKNOWLEDGMENTS

In conclusion, I wish to express my appreciation to the staffs of the various State agencies whose time and dedicated efforts made this report possible.

Sincerely,

Thomas W. Johnson
Director

INDEPENDENT ACCOUNTANTS' REPORT

The Honorable Bob Taft, Governor
State of Ohio
Columbus, Ohio

We have audited the accompanying financial statements of the governmental activities, business-type activities, aggregate discretely presented component units, each major fund, and aggregate remaining fund information of the State of Ohio (the State) as of and for the year ended June 30, 2002, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State's management. Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the following organizations:

Primary Government: Capital Square Review and Advisory Board (Underground Parking Garage); Office of the Auditor of State; Ohio Bureau of Workers' Compensation and Industrial Commission of Ohio; State Treasury Asset Reserve of Ohio; Treasurer of State Lease Revenue Bonds; and Variable College Savings Plan.

Blended Component Units: Ohio Building Authority and State Highway Patrol Retirement System.

Discretely Presented Component Units: Bowling Green State University; Central State University; Cleveland State University; Kent State University; Miami University; The Ohio State University; Ohio University; Shawnee State University; University of Akron; University of Cincinnati; University of Toledo; Wright State University; Youngstown State University; Cincinnati State Community College; Clark State Community College; Columbus State Community College; Edison State Community College; Northwest State Community College; Owens State Community College; Southern State Community College; Terra State Community College; Washington State Community College; and Medical College of Ohio at Toledo.

In addition, we did not audit the financial statements of the Public Employees Retirement System, Police and Fire Pension Fund, State Teachers Retirement System, and School Employees Retirement System, whose assets are held by the Treasurer of State and are included as part of the State's Aggregate Remaining Fund Information. These financial statements reflect the following percentages of total assets and revenues or additions of the indicated opinion units:

Opinion Unit	Percent of Opinion Unit's Total Assets	Percent of Opinion Unit's Total Revenues / Additions
Governmental Activities	1%	0%
Business-Type Activities	86%	33%
Aggregate Discretely Presented Component Units	74%	87%
Aggregate Remaining Fund Information	96%	26%
Workers' Compensation	100%	100%
Ohio Building Authority	100%	100%
Underground Parking Garage	100%	100%
Office of Auditor of State	100%	100%

Those financial statements listed above were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for these independently audited organizations is based on the reports of the other auditors.

The Honorable Bob Taft, Governor

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of the other auditors provide a reasonable basis for our opinions.

In our opinion, based on our audit and the reports of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, business-type activities, aggregate discretely presented component units, each major fund, and aggregate remaining fund information of the State of Ohio as of June 30, 2002, and respective changes in financial position and cash flows, where applicable, and respective budgetary comparison for the major governmental funds thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As described in Note 2, during the year ended June 30, 2002, the State of Ohio implemented a new financial reporting model and the following pronouncements as required by the provisions of Governmental Accounting Standards Board's Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments*; No. 35, *Basic Financial Statements and Management's Discussion and Analysis for Public Colleges and Universities*; No. 37, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments: Omnibus*; No. 38, *Certain Financial Statement Note Disclosures*; and Governmental Accounting Standards Board's Interpretation No. 6, *Recognition and Measurement of Certain Liabilities and Expenditures in Governmental Fund Financial Statements*.

The Management's Discussion and Analysis and Infrastructure Assets Accounted for Using the Modified Approach, as listed in the table of contents, are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

We conducted our audit to form opinions on the financial statements that collectively comprise the State's basic financial statements. The introductory section, combining fund statements, individual fund schedules and statistical tables are presented for additional analysis and are not a required part of the basic financial statements. We and the other auditors subjected the combining fund statements and individual fund schedules to the auditing procedures applied in the audit of the basic financial statements. In our opinion, based on our audit and the reports of the other auditors, this information is fairly stated in all material respects in relation to the basic financial statements taken as a whole. We did not subject the introductory section and statistical tables to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

BETTY MONTGOMERY
Auditor of State

January 27, 2003

State of Ohio

Management's Discussion and Analysis

(Unaudited)

Introduction

This section of the State of Ohio's annual financial report presents management's discussion and analysis of the State's financial performance during the fiscal year ended June 30, 2002. The management's discussion and analysis section should be read in conjunction with the preceding transmittal letter and the State's financial statements, which follow.

Fiscal year 2002 was the first year for the State of Ohio to implement the new reporting provisions of Governmental Accounting Standards Board (GASB) Statement No. 34, *Basic Financial Statements—and Management's Discussion and Analysis—for State and Local Governments*. The State has not restated government-wide financial data for fiscal year 2001 for purposes of providing extensive comparative data in this management's discussion and analysis because certain prior-year data is unavailable. Consequently, the foregoing discussion contains few financial comparisons with the previous year. In future years, however, as prior-year information becomes available, a comparative analysis of the government-wide data will be presented.

Financial Highlights

Government-wide Financial Statements

Net assets of the State's primary government reported in the amount of \$21.4 billion, as of June 30, 2002, decreased \$4.4 billion since the previous year. Net assets of the State's component units reported in the amount of \$9.2 billion, as of June 30, 2002, increased \$192.3 million since the end of last fiscal year.

Fund Financial Statements

Governmental funds reported combined ending fund balances of \$4.55 billion that was comprised of \$565.9 million reserved for specific purposes, such as for debt service, state and local government highway construction, and federal programs; \$4.67 billion reserved for nonappropriable items, such as encumbrances, noncurrent loans, loan commitments, and inventories; \$321.9 million in designations for budget stabilization and compensated absences; and a \$1.01 billion deficit.

As of June 30, 2002, the General Fund's fund balance was approximately \$875.4 million, including \$226.2 million reserved for specific purposes; \$329.8 million reserved for nonappropriable items; and \$307 million and \$12.4 million in designations for budget stabilization and compensated absences, respectively. The General Fund's fund balance declined by \$1.23 billion or 58.5 percent during fiscal year 2002. Despite weaker-than-expected tax revenue for fiscal year 2002, the General Fund ended the year with an overall positive fund balance. This was primarily due to lower-than-budgeted spending, the availability of \$687.7 million for spending in fiscal year 2002 from resources designated for budget stabilization and human services budget stabilization purposes (also known as "Rainy Day" funds), as of the end of fiscal year 2001, in the amounts of \$587.7 and \$100 million, respectively, and various transfers-in from other funds, including a \$289.6 million transfer from the Tobacco Settlement Fund.

Proprietary funds reported net assets of \$3.93 billion, as of June 30, 2002, a decrease of \$3.12 billion since June 30, 2001. Most of the decline was due to the \$2.63 billion, \$353.7 million, and \$135.5 million net losses reported for the Workers' Compensation, Unemployment Compensation, and Tuition Trust Authority enterprise funds, respectively. The net loss for the Workers' Compensation Enterprise Fund is attributable to \$1.47 billion in premium dividend reductions and refund expenses, a \$430.1 million investment loss, and benefits and claims expenses that exceeded premium and assessment income by \$571.7 million. For the Unemployment Compensation Enterprise Fund, benefits and claims expenses of \$1.66 billion exceeded total operating and nonoperating revenues by approximately \$350.9 million. The Tuition Trust Authority's decline was due to tuition benefit expenses exceeding income from the sale of tuition credits by \$112.4 million and investment losses totaling \$16.8 million.

Long-Term Debt — Bonds and Notes Payable and Certificates of Participation Obligations:

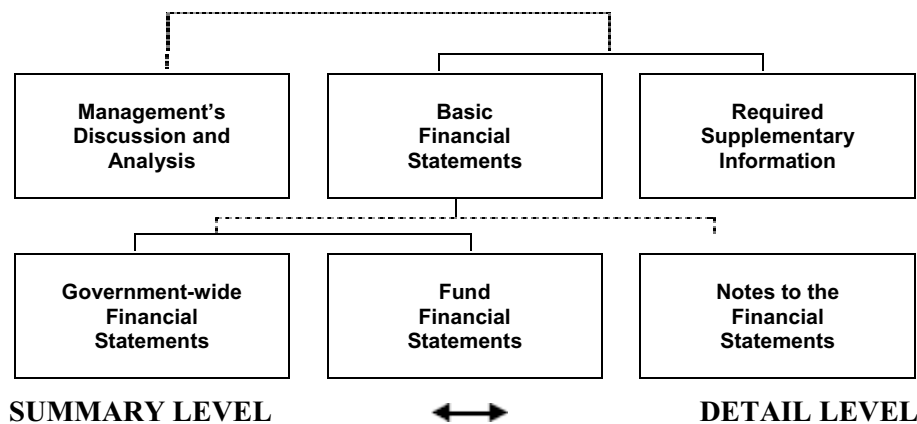

Overall, the total long-term debt for the State's primary government increased \$458.8 million or 5.6 percent during fiscal year 2002 to end the fiscal year with a reported balance of \$8.66 billion in long-term debt. During the year, the State issued \$975 million in general obligation bonds, \$100 million in revenue bonds, and \$466.5 million in special obligation bonds, of which \$341.4 million were refunding bonds. Changes in the primary government's long-term debt for fiscal year 2002 can be found in NOTE 15.

Overview of the Financial Statements

This annual report consists of management’s discussion and analysis, basic financial statements, including the accompanying notes to the financial statements, required supplementary information, and combining statements for the nonmajor governmental funds and the fiduciary funds. The basic financial statements are comprised of the government-wide financial statements and fund financial statements.

Figure 1 below illustrates how the required parts of this annual report are arranged and relate to one another. In addition to these required elements, as explained later, this report includes an optional section that contains combining statements that provide details about the State’s nonmajor governmental funds.

**Figure 1
Required Components of the
State of Ohio’s Annual Financial Report**

The *Government-wide Financial Statements* provide financial information about the State as a whole, including its component units.

The *Fund Financial Statements* focus on the State’s operations in more detail than the government-wide financial statements. The financial statements presented for governmental funds report on the State’s general government services. Proprietary funds statements report on the activities, which the State operates like private-sector businesses. Fiduciary funds statements provide information about the financial relationships in which the State acts solely as a trustee or agent for the benefit of others outside of the government, to whom the resources belong.

Following the fund financial statements, the State includes financial statements for its major component units within the basic financial statements section. Nonmajor component units are also presented in aggregation under a single column in the component unit financial statements.

The basic financial statements section also includes notes that more fully explain the information in the government-wide and fund financial statements; the notes provide more detailed data that are essential to a full understanding of the data presented in the financial statements. The notes to the financial statements can be found on pages 62 through 120 of this report.

In addition to the basic financial statements and accompanying notes, a section of required supplementary information further discusses the assessed condition and estimated and actual maintenance and preservation costs of the state’s highway and bridge infrastructure assets that are reported using the modified approach. Limited in application to a government’s infrastructure assets, the modified approach provides an alternative to the traditional recognition of depreciation expense. Required supplementary information can be found on pages 122 and 123 of this report.

Figure 2 on the following page summarizes the major features of the State’s financial statements.

Figure 2
Major Features of the State of Ohio's Government-wide and Fund Financial Statements

	Fund Statements			
	Government-wide Statements	Governmental Funds	Proprietary Funds	Fiduciary Funds
Scope	Entire State government (except fiduciary funds) and the State's component units	The activities of the State that are not proprietary or fiduciary, such as general government, transportation, justice and public protection, etc.	Activities the State operates similar to private businesses such as the workers' compensation insurance program, lottery, tuition credit program	Instances in which the State is the trustee or agent for someone else's resources
Required Financial Statements	<ul style="list-style-type: none"> • Statement of Net Assets • Statement of Activities 	<ul style="list-style-type: none"> • Balance Sheet • Statement of Revenues, Expenditures, and Changes in Fund Balance 	<ul style="list-style-type: none"> • Statement of Net Assets • Statement of Revenues, Expenses, and Changes in Net Assets • Statement of Cash Flows 	<ul style="list-style-type: none"> • Statement of Net Assets • Statement of Changes in Fiduciary Net Assets
Accounting Basis and Measurement Focus	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus	Accrual accounting and economic resources focus
Type of asset/liability information	All assets and liabilities, both financial and capital, and short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, and short-term and long-term	All assets and liabilities, both financial and capital, and short-term and long-term
Type of inflow/outflow information	All revenues and expenses during the year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during the year, regardless of when cash is received or paid	All revenues and expenses during the year, regardless of when cash is received or paid

Government-wide Financial Statements

The government-wide financial statements consist of the Statement of Net Assets and the Statement of Activities. For these statements, the State applies accounting methods similar to those used by private-sector companies; that is, the State follows the accrual basis of accounting and the economic resources focus when preparing the government-wide financial statements. The Statement of Net Assets includes all of the government's assets and liabilities. All of the current year's revenues and expenses are accounted for in the Statement of Activities regardless of the timing of related cash inflows or outflows.

The two government-wide financial statements report the State's net assets and how they have changed. Net assets — the difference between the State's assets and liabilities — is one way to measure the State's financial health, or position. Over time, increases or decreases in the State's net assets indicate whether its financial health has improved or deteriorated, respectively. However, a reader should consider additional nonfinancial factors such as changes in the State's economic indicators and the condition of the State's highway system when assessing the State's overall financial status.

The State's government-wide financial statements, which can be found on pages 30 through 33 of this report, are divided into three categories as follows.

Governmental Activities — Most of the State's basic services are reported under this category, such as primary, secondary and other education, higher education support, public assistance and Medicaid, health and human services, justice and public protection, environmental protection and natural resources, transportation, general government, community and economic development, and intergovernmental. Taxes, federal grants, charges for

services, including license, permit, and other fee income, fines, and forfeitures, and restricted investment income finance most of these activities.

Business-type Activities — The State charges fees to customers to help cover the costs of certain services it provides. The State reports the following programs and activities as business-type: workers' compensation insurance program, lottery operations, unemployment compensation program, the leasing and maintenance operations of the Ohio Building Authority, guaranteed college tuition credit program, liquor control operations, underground parking garage operations at the statehouse, and the Auditor of State's governmental auditing and accounting services.

Component Units — The State presents the financial activities of the School Facilities Commission, Arts and Sports Facilities Commission, SchoolNet Commission, Ohio Water Development Authority, and 23 state-assisted colleges and universities as discretely presented component units under a separate column in the government-wide financial statements. The Ohio Building Authority is presented as a blended component unit with its activities blended and included under governmental and business-type activities. Although legally separate, the State is financially accountable for its component units, as is further explained in NOTE 1A. to the financial statements.

Fund Financial Statements

The fund financial statements provide more detailed information about the State's most significant funds — not the State as a whole. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. State law and bond covenants mandate the use of some funds. The Ohio General Assembly establishes other funds to control and manage money for particular purposes or to show that the State is properly using certain taxes and grants.

The State employs fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The State has three kinds of funds — governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds — Most of the State's basic services are included in governmental funds, which focus on how cash and other financial assets that can readily be converted to cash flow in and out (i.e., near-term inflows and outflows of spendable resources) and the balances remaining at year-end that are available for spending (i.e., balances of spendable resources). Consequently, the governmental fund financial statements provide a detailed short-term view that helps the financial statement reader determine whether there are more or fewer financial resources that can be spent in the near future to finance the State's programs. The State prepares the governmental fund financial statements applying the modified accrual basis of accounting and a current financial resources focus. Because this information does not encompass the additional long-term focus of the government-wide statements, a reconciliation schedule, which follows each of the governmental fund financial statements, explains the relationship (or differences) between them.

The State's governmental funds include the General Fund and 14 special revenue funds, 21 debt service funds, and 10 capital projects funds. Under separate columns, information is presented in the Balance Sheet and Statement of Revenues, Expenditures and Changes in Fund Balances for the General Fund and the Job, Family and Other Human Services, Education, Highway Operating, and Revenue Distribution special revenue funds, all of which are considered major funds. Data from the other 41 governmental funds, which are classified as nonmajor funds, are combined into a single, aggregated presentation under a single column on the fund financial statements. Individual fund data for each of these nonmajor governmental funds is provided in the form of combining statements elsewhere in this report.

For budgeted governmental funds, the State also presents budgetary comparison statements and schedules in the basic financial statements and combining statements, respectively, to demonstrate compliance with the appropriated budget. The State's budgetary process is explained further in NOTE 1D. to the financial statements.

The basic governmental fund financial statements can be found on pages 34 through 45 of this report while the combining fund statements and schedules can be found on pages 125 through 187.

Proprietary Funds — Services for which the State charges customers a fee are generally reported in proprietary funds. Financial statements for the proprietary funds, which are classified as enterprise funds, provide both long- and short-term financial information. Like the government-wide financial statements, the State prepares the proprietary fund financial statements applying the accrual basis of accounting and an economic resources focus. The eight enterprise funds, all of which are considered to be major funds, are the same as the State's business-type activities reported in the government-wide financial statements, but the proprietary fund financial statements provide more detail and additional information, such as information on cash flows.

The basic proprietary fund financial statements can be found on pages 46 through 53 of this report.

Fiduciary Funds — The State is the trustee, or fiduciary, for assets that — because of a trust arrangement — can only be used for the trust beneficiaries. The State is responsible for ensuring the assets reported in these funds are used for their intended purposes. All of the State’s fiduciary activities are reported in a separate statement of fiduciary net assets and a statement of changes in fiduciary net assets. The State excludes the State Highway Patrol Retirement System Pension Trust Fund, Variable College Savings Plan Private-Purpose Trust Fund, STAROhio Investment Trust Fund, and the agency funds from its government-wide financial statements because the State cannot use these assets to finance its operations.

The basic fiduciary fund financial statements can be found on pages 54 through 57 of this report.

FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

Net Assets. During fiscal year 2002, as shown in the table on the following page, the combined net assets of the State’s primary government decreased \$4.40 billion or 17 percent. Net assets reported for governmental activities decreased \$1.28 billion or 6.9 percent and business-type activities decreased \$3.12 billion or 44.3 percent.

Condensed financial information derived from the Statement of Net Assets for the primary government follows.

Primary Government Statement of Net Assets As of June 30, 2002 (dollars in thousands)			
	Governmental Activities	Business-Type Activities	Total Primary Government
Assets:			
Current and Other Noncurrent Assets	\$10,846,122	\$25,759,077	\$36,605,199
Capital Assets.....	21,619,224	238,338	21,857,562
Total Assets	32,465,346	25,997,415	58,462,761
Liabilities:			
Current and Other Liabilities	6,011,055	4,593,419	10,604,474
Noncurrent Liabilities	8,987,221	17,473,966	26,461,187
Total Liabilities	14,998,276	22,067,385	37,065,661
Net Assets:			
Invested in Capital Assets, Net of Related Debt	18,653,976	24,197	18,678,173
Restricted	1,878,515	3,918,679	5,797,194
Unrestricted	(3,065,421)	(12,846)	(3,078,267)
Total Net Assets	\$17,467,070	\$3,930,030	\$21,397,100

As of June 30, 2002, the primary government’s investment in capital assets (i.e., land, buildings, land improvements, machinery and equipment, state vehicles, infrastructure, and construction-in-progress), less related outstanding debt, was \$18.68 billion. Restricted net assets were approximately \$5.80 billion, resulting in a \$3.08 billion deficit. Net assets are restricted when constraints on their use are 1.) externally imposed by creditors, grantors, contributors, or laws or regulations of other governments or 2.) legally imposed through constitutional or enabling legislation. Unrestricted net assets consist of net assets that do not meet the definition of “restricted” or “invested in capital assets, net of related debt.”

The government-wide Statement of Net Assets reflects a \$3.07 billion deficit for governmental activities. The State of Ohio, like many other state governments, issues general and special obligation debt, the proceeds of which benefit local governments and component units. The proceeds are used to build facilities for public-assisted colleges and universities and local school districts and finance infrastructure improvements for local governments. The policy of selling general obligation and special obligation bonds for these purposes has been the practice for many years. Of the \$8.16 billion of outstanding general obligation and special obligation debt at June 30, 2002, \$4.4 billion is attributable to debt issued for state assistance to component units (School Facilities Commission and the colleges and universities) and local governments. The balance sheets of component unit and local government recipients reflect ownership of the related constructed capital assets without the burden of recording the debt. Unspent proceeds related to these bond issuances are included on the Statement of Net Assets as restricted net assets. By issuing such debt, the State is left to reflect significant liabilities without the benefit of recording the capital assets constructed with the proceeds from the debt issuances.

Additionally, as of June 30, 2002, the State's governmental activities have significant unfunded liabilities for compensated absences in the amount of \$381.9 million and a \$598.3 million interfund payable due to the workers' compensation component of business-type activities for the State's workers' compensation liability (see NOTE 7A.). These unfunded liabilities also contribute to the reported deficit for governmental activities.

Condensed financial information derived from the Statement Activities, which reports how the net assets of the State's primary government changed during fiscal year 2002, follows.

**Primary Government
Statement of Activities

Increase (Decrease) in Net Assets.....	(1,284,541)	(3,118,820)	(4,403,361)
Net Assets, July 1.....	18,751,611	7,048,850	25,800,461
Net Assets, June 30	\$17,467,070	\$3,930,030	\$21,397,100

Governmental Activities

The \$1.28 billion decrease in net assets during fiscal year 2002 primarily resulted from lower-than-expected tax revenues and increased spending in the various functions of state government that required the State to spend \$687.7 million in resources, which had been designated for budget and human services stabilization purposes, as of the end of fiscal year 2001. The State attributes most of the decline in tax revenues to a slowdown in the economy. Also, increased spending in the State's largest public assistance-related program, Medicaid, most likely resulted from a slowdown in the economy and overall increases in health care costs.

The following chart illustrates revenue sources of governmental activities as percentages of total revenues reported for the fiscal year ended June 30, 2002.

**Governmental Activities — Sources of Revenue
Fiscal Year 2002**

*Other General Revenue includes Escheat Property, Tobacco Settlement and Unrestricted Investment Earnings

Total FY 02 Revenue for Governmental Activities = \$33.44 Billion

The following chart illustrates expenses by program of governmental activities as percentages of total program expenses reported for the fiscal year ended June 30, 2002.

**Governmental Activities — Expenses by Program
Fiscal Year 2002**

Total FY 02 Program Expenses for Governmental Activities = \$35.46 Billion

The following table presents the total expenses and net cost of each of the State's governmental programs. The net cost (total program expenses less revenues generated by the program) represents the financial burden that was placed on the State's taxpayers by each of these programs; costs not covered by program revenues are essentially funded with the State's general revenues, which are primarily comprised of taxes, escheat property, tobacco settlement revenues, and unrestricted investment income.

Program Expenses and Net Costs of Governmental Activities by Program
For the Fiscal Year Ended June 30, 2002
(dollars in thousands)

Program	Program Expenses	Net Cost of Program	Net Cost as Percentage of Total Expenses for Program	Net Cost as Percentage of Total Expenses — All Programs
Primary, Secondary and Other Education	\$ 8,171,648	\$6,922,682	84.7%	19.5%
Higher Education Support	2,604,961	2,542,710	97.6	7.2
Public Assistance and Medicaid	11,953,033	3,734,966	31.3	10.5
Health and Human Services	2,844,671	1,253,152	44.1	3.5
Justice and Public Protection	2,499,689	1,628,249	65.1	4.6

Interest on Long-Term Debt	203,811	203,811	100.0	.6
Total Governmental Activities	\$35,464,673	\$20,867,966	58.8	58.8%

Business-Type Activities

The State's enterprise funds reported net assets of \$3.93 billion, as of June 30, 2002, as compared to \$7.05 billion in net assets, as of June 30, 2001. These results were caused in part by the Workers' Compensation Fund, which reported net assets of \$1.89 billion, as of June 30, 2002, as compared to \$4.52 billion in net assets, as of June 30, 2001, a 58.2 percent decrease. Also contributing to the decline in business-type activities was the Unemployment Compensation Fund, which reported net assets of \$1.91 billion, as of June 30, 2002, as compared to \$2.27 billion, a 15.6 percent decrease. Finally, the Tuition Trust Authority Fund reported a 207.7 percent decrease in net assets since June 30, 2001, ending fiscal year 2002 with a \$70.3 million deficit. The chart below compares program expenses and program revenues for business-type activities.

Business-Type Activities — Expenses and Program Revenues
Fiscal Year 2002

FINANCIAL ANALYSIS OF THE STATE'S FUNDS

The State uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Funds

Governmental funds reported the following results, as of and for the year ended June 30, 2002 (dollars in thousands).

	General Fund	Other Major Funds	Nonmajor Governmental Funds	Total Governmental Funds
Unreserved/Undesignated Fund Balance (Deficit)	\$ —	\$(1,203,678)	\$190,251	\$(1,013,427)
Designated Fund Balance for Budget Stabilization	307,028	—	—	307,208
Designated Fund Balance for Compensated Absences.....	12,393	—	2,487	14,880
Total Fund Balance.....	875,457	1,105,579	2,567,502	4,548,538
Total Revenues.....	20,497,230	9,549,135	2,999,212	33,045,577
Total Expenditures.....	21,777,207	9,762,821	5,036,062	36,576,090

General Fund

Fund balance for the General Fund, the main operating fund of the State, had decreased by \$1.23 billion during the current fiscal year. Key factors for the decline were lower personal income and corporate franchise tax collections resulting from a slowdown in the economy and mandated spending increases in the Medicaid Program and for primary and secondary education, which were largely due to changes in funding methods prompted by the DeRolph court case.

General Fund Budgetary Highlights

The State ended the first year of its biennial budget period on June 30, 2002 with a General Fund budgetary fund balance (i.e., cash less encumbrances) of \$847.6 million. Total budgetary sources for the General Fund (including \$404.6 million in transfers from other funds) in the amount of \$21.9 billion were below final estimates by \$372.7 million or 1.7 percent during fiscal year 2002, while total tax receipts were below final estimates by \$791.2 million or 4.9 percent. The weaker-than-expected revenue picture primarily resulted from lower-than-anticipated receipts from sales and use tax, personal income tax, and corporate franchise tax. Total budgetary uses for the General Fund (including \$57.3 million in transfers to other funds) in the amount of \$23.4 billion were below final estimates by \$648.3 million or 2.7 percent for fiscal year 2002.

Weak economic conditions continuing into fiscal year 2002 necessitated revisions to the State's estimated fiscal year 2002 revenues for the General Fund. In October 2001, the Ohio Office of Budget and Management (OBM) officially revised its fiscal year 2002 revenue estimates downward by \$628.7 million for the General Revenue Fund (GRF). The GRF is the largest, non-GAAP, budgetary-basis operating fund included in the State's General Fund. Also, in October 2001, because of the projected decline in revenues, state agency spending budgets for fiscal year 2002 were adjusted downward when Governor Taft ordered approximately \$224 million in GRF appropriation reductions, a six-percent cut across most state agencies. Later during the fiscal year, the Governor also ordered a statewide hiring freeze, imposed a moratorium on year-end equipment purchases, and placed restrictions on employee travel to further control costs.

Additionally, with legislative authorization, OBM made the following significant resource reallocations to fill the existing gap between actual spending and actual revenues caused by revenue shortfalls during fiscal year 2002:

\$587.7 million and \$100 million, which had been designated in the General Fund for budget stabilization and human services budget stabilization purposes, respectively, were reallocated for spending. The actual amount OBM reallocated for spending in fiscal year 2002 from resources designated for budget stabilization purposes was \$65 million less than the amount authorized in Senate Bill 261. As of June 30, 2002, fund balance designated in the General Fund for budget stabilization purposes on a GAAP basis was \$319.4 million; on a budgetary basis, \$427.9 million of the General Fund's budgetary fund balance was designated for budget stabilization purposes, as of June 30, 2002. For the General Fund, the fund balance designation for budget stabilization is lower on a GAAP basis because the State's reported designation for budget stabilization could not exceed the amount of residual fund balance that remained after the posting of reserves for specific purposes and nonappropriable items. There was no designation of fund balance in the General Fund for human services budget stabilization purposes, as of June 30, 2002.

\$289.6 million from tobacco settlement revenues and \$60 million in earned federal revenues accounted for in the Special Revenue Fund were transferred to the General Fund.

Other Major Governmental Funds

Fund balance for the Job, Family and Other Human Services Fund, as of June 30, 2002, totaled \$143.3 million, a slight increase of \$4.9 million since June 30, 2001. Revenues exceeded expenditures by \$95.6 million, and of the excess of revenues over expenditures, \$90.7 million in net transfers-out were made to other funds. During fiscal year 2002, the State began accounting for the major federal program, Temporary Assistance to Needy Families in the Job, Family and Other Human Services Fund. Prior to fiscal year 2002, this program had been accounted for in the State's General Fund.

Fund balance for the Education Fund, as of June 30, 2002, totaled \$28.7 million, a decrease of \$20 million since June 30, 2001. Fiscal year 2002 net transfers-in for the fund in the amount of \$616.9 million was not enough to cover the excess of expenditures over revenues reported for the fund in the amount of \$637 million.

Fund balance for the Highway Operating Fund, as of June 30, 2002, totaled \$814.7 million, a decrease of \$132.6 million since June 30, 2001. The decline was caused by increased transportation spending of \$1.86 billion for fiscal year 2002 compared with \$1.71 billion during the previous fiscal year as the fund's revenues remained mostly unchanged since the last fiscal year and net transfers-in for fiscal year 2002 decreased by more than \$72.7 million when compared to fiscal year 2001 results.

Fund balance for the Revenue Distribution Fund, as of June 30, 2002, totaled \$118.8 million, a slight decrease of \$8.4 million since June 30, 2001. Fiscal year 2002 transfers-out to other governmental funds of \$731.3 million were higher than the \$728.2 million transfers-out reported for fiscal year 2001, thus contributing to the decrease in fund balance.

Proprietary Funds

The State's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

For the Workers' Compensation Fund, the decrease in net assets was primarily due to premium reductions and refund expenses of \$1.47 billion, benefits and claims expenses of \$2.93 billion exceeded total operating and nonoperating revenues by approximately \$558.1 million, and a \$1.1 billion decrease in the fair value of the fund's investment portfolio caused by downturns in world equity markets.

The Workers Compensation Oversight Commission approved a one-time 75-percent premium reduction for Ohio private employers for the policy year July 1, 2001 through June 30, 2002, which produced estimated savings of \$1.3 billion to these employers. The Oversight Commission also approved a one-time 50-percent premium reduction for public taxing district employers for their policy year beginning January 1, 2002, which produced estimated savings of \$144 million to these employers through December 31, 2002. Additionally, public taxing district employers qualified for an additional 25-percent cash refund by attending a Public Employer Summit, hosted by the Bureau of Workers' Compensation. Approximately \$66.5 million will be returned to employers who attended the meetings. These reductions and refunds follow the January 1, 2001 policy year's one-time 75-percent premium reduction, which produced an estimated \$200 million in savings for public employer taxing districts.

In fiscal year 2002, premium and assessment income for the Workers' Compensation Fund increased \$341 million, primarily due to growth in the payroll base and an increase in assessment rates for administrative costs. Workers' compensation benefits and claims expenses were \$2.93 billion in fiscal year 2002 as compared to \$2.50 billion in fiscal year 2001. The increase in workers' compensation benefits is due in part to increased utilization of medical services and medical cost inflation. A decline in the number of newly awarded permanent total disability claims has helped to reduce the impact of the increased medical costs. Additionally, the Bureau of Workers' Compensation Fund experienced a net investment loss of \$430.1 million or a decline of 183.6 percent when compared to net investment income of \$514.6 million reported in the previous fiscal year. The fund's investment losses are due to declines in the world equity markets during the period.

The Unemployment Compensation Enterprise Fund reported a net loss of \$353.7 million during fiscal year 2002. Unemployment benefits and claims expenses of \$1.66 billion exceeded total operating and nonoperating revenues by approximately \$350.9 million. Investment income for the fund during fiscal year 2002 was \$125 million, down \$24.9 million or 16.6 percent from fiscal year 2001. The fund's net loss resulted despite the deposit of an additional \$130.5 million in federal funds received during fiscal year 2002 for the payment of extended unemployment benefits to laid-off workers in Ohio for an additional 13 weeks and the national Reed Act distribution of \$346.9 million to Ohio for deposit in the State's unemployment trust account in Washington D.C. in March 2002. The Reed Act provides for the distribution of funds from federal unemployment accounts to the state trust funds in times when the balances in the federal accounts would exceed their statutory ceilings, resulting in federal employer tax overpayments being returned to the states. The Reed Act funds can be used to reduce taxes on em-

ployers and to pay unemployment benefits and costs the states incur for the administration of unemployment services, veteran employment services, and some Bureau of Labor Statistics programs.

For the Tuition Trust Authority Fund, the \$70.3 million deficit, as of June 30, 2002, resulted when the fund reported a net loss of \$135.5 million for fiscal year 2002. By June 30, 2002, tuition benefits payable had dramatically increased because of the estimated increase in future tuition growth and lower-than-projected investment returns. The fund's investment loss for fiscal year 2002 was \$16.8 million, a decrease of 215 percent when compared with investment income reported at \$14.6 million (as restated) for fiscal year 2001. The fund also reported an increase in benefits and claims expense for fiscal year 2002 resulting from higher sales in conjunction with higher-than-expected tuition growth and the estimated increase in projected future tuition growth. For fiscal year 2002, the benefits and claims expense was \$278.7 million, a 124.8 percent increase over the \$124 million in benefits and claims expenses reported for fiscal year 2001.

The Lottery Commission Fund reported approximately \$640 million in income before transfers of \$635.2 million and \$140 thousand to the Education and General funds, respectively, posting a modest \$4.7 million gain in the fund's net assets during fiscal year 2002 while all other proprietary funds posted net losses for the year. The Liquor Control Fund reported a net loss of \$350 thousand after transferring \$112 million to the General Fund and \$19.6 million to other governmental funds. In fiscal year 2002, transfers from the proprietary funds to the governmental funds totaled \$807.4 million, up \$41.5 million or 5.4 percent when compared to the \$765.9 million in transfers-out reported for fiscal year 2001.

Capital Asset and Debt Administration

Capital Assets

As of June 30, 2002 and June 30, 2001, the State had invested \$21.86 billion and \$21.18 billion, net of accumulated depreciation of \$1.71 billion and \$1.57 billion, respectively, in a broad range of capital assets, as follows.

Capital Assets, Net of Depreciation
As of June 30, 2002 with comparatives as of June 30, 2001
(dollars in thousands)

	20,316,722	229,511	20,546,233	19,881,345	190,380	20,071,725
Construction-in-Progress	1,302,502	8,827	1,311,329	1,103,942	1,123	1,105,065
Total Capital Assets, Net	<u>\$21,619,224</u>	<u>\$238,338</u>	<u>\$21,857,562</u>	<u>\$20,985,287</u>	<u>\$191,503</u>	<u>\$21,176,790</u>

As a result of the implementation of GASB 34's new reporting requirements for fiscal year 2002, the State, for the first time, included infrastructure assets in its capital assets balances and recognized \$152.8 million in annual depreciation expense relative to its other general governmental capital assets.

Additionally, the State completed construction on a variety of projects at various state facilities during fiscal year 2002 totaling approximately \$473.5 million. The total increase in the State's capital assets, net of accumulated depreciation, for the current fiscal year was 3.2 percent (a 3 percent increase for governmental activities and a 24.5 percent increase for business-type activities). As further detailed in NOTE 19D. of the notes to the financial statements, the State had \$227.9 million in major construction commitments (unrelated to infrastructure).

Modified Approach

For reporting its highway and bridge infrastructure assets, the State has adopted the use of the modified approach. The modified approach allows a government *not to report depreciation expense* for eligible infrastructure assets if the government manages the eligible infrastructure assets using an asset management system that possesses certain characteristics and the government can document that the eligible infrastructure assets are being preserved approximately at (or above) a condition level it sets (and discloses). Under the modified approach, the State is required to expense all spending (i.e., preservation and maintenance costs) on infrastructure assets except for additions and improvements. Infrastructure assets accounted for using the modified approach include approximately 42,601 in lane miles of highway (12,114 in lane miles for the priority highway subsystem and 30,487 in lane miles for the general highway subsystem) and approximately 81 million square feet of deck area that comprises approximately 12,000 bridges for which the State has the responsibility for ongoing maintenance.

Ohio accounts for its pavement network in two subsystems: *Priority*, which comprises interstate highways, free-ways, and multi-lane portions of the National Highway System, and *General*, which comprises two-lane routes outside of cities. It is the State’s goal to allow no more than 25 percent of the total lane-miles reported for each of the priority and general subsystems, respectively, to be classified with a “poor” condition rating. The most recent condition assessment, completed by the Ohio Department of Transportation for calendar year 2001, indicates that only 4.2 percent and 3.0 percent of the priority and general subsystems, respectively, were assigned a “poor” condition rating.

For the bridge network, it is the State’s intention to allow no more than 15 percent of the total number of square feet of deck area to be in “fair” or “poor” condition. The most recent condition assessment, completed by the Ohio Department of Transportation for calendar year 2001, indicates that only 3.3 percent and .04 percent of the number of square feet of bridge deck area were considered to be in “fair” and “poor” conditions, respectively.

Total actual maintenance and preservation costs for the priority and general subsystems were \$319.5 million and \$152 million, respectively, compared to estimated costs of \$251.2 million for the priority system and \$111 million for the general system. Total actual maintenance and preservation costs for the bridge network was \$210.1 million compared to estimated costs of \$192.1 million.

More detailed information on the State’s capital assets can be found in NOTE 8 to the financial statements.

Debt — Bonds and Notes Payable and Certificates of Participation Obligations

As of June 30, 2002 and June 30, 2001, the State had total debt of \$8.66 billion and \$8.20 billion, respectively, as follows.

Bonds and Notes Payable and Certificates of Participation
As of June 30, 2002 with comparatives for June 30, 2001
(dollars in thousands)

	As of June 30, 2002			As of June 30, 2001		
	Governmental Activities	Business-Type Activities	Total	Governmental Activities	Business-Type Activities	Total
Bonds and Notes Payable:						
General Obligation Bonds	\$3,771,129	\$ —	\$3,771,129	\$3,034,037	\$ —	\$3,034,037
Revenue Bonds and Notes.....	297,638	190,723	488,361	218,900	202,614	421,514
Special Obligation Bonds	4,389,102	—	4,389,102	4,731,842	—	4,731,842
Certificates of Participation.....	9,900	—	9,900	12,305	—	12,305
Total Debt.....	\$8,467,769	\$190,723	\$8,658,492	\$7,997,084	\$202,614	\$8,199,698

The State’s general obligation bonds are backed by its full faith and credit. Revenue bonds issued by the State, including the Ohio Building Authority (OBA), a blended component unit of the State, are secured with revenues pledged for the retirement of debt principal and the payment of interest. Special obligation bonds issued by the State and the OBA are supported with lease payments from tenants of facilities constructed with the proceeds from the bond issuances. Under certificate of participation (COPs) financing arrangements, the State is required to make rental payments (subject to appropriations) that approximate interest and principal payments made by trustees to certificate holders.

During fiscal year 2002, the State issued \$975 million in general obligation bonds, \$100 million in revenue bonds, and \$466.5 million in special obligation bonds, of which \$341.4 million were refunding bonds. The total increase in the State’s debt obligations for the current fiscal year was 5.6 percent (a 5.9 percent increase for governmental activities and a 5.9 percent decrease for business-type activities).

Credit Ratings

Ohio's credit ratings for general obligation debt are Aa1 by Moody's Investors Service, Inc. (Moody's) and AA+ by Fitch Inc. (Fitch). Standard & Poor's Ratings Services (S&P) rates the State's general obligation debt AA+, except for Highway Capital Improvement Obligations, which are rated AAA.

State obligations (issued by the Ohio Building Authority and the Treasurer of State) secured by General Revenue Fund appropriations are rated Aa2 by Moody's and AA by S&P and Fitch.

Moody's on December 5, 2001 and S&P on June 5, 2002 changed their "credit outlook" on the State from "stable" to "negative." The change in credit outlook is not a precursor to a rating change, but is an indication over the intermediate to longer term of a potential change.

Limitations on Debt

A 1999 amendment to the Ohio Constitution provides an annual debt service "cap" on general obligation bonds and other direct obligations payable from the General Revenue Fund (GRF) or net state lottery proceeds. Generally, such bonds may not be issued if the future fiscal year debt service on the new bonds and previously issued bonds exceeds five percent of total estimated GRF revenues plus net state lottery proceeds during the fiscal year of issuance. Application of the cap may be waived in a particular instance by a three-fifths vote of each house of the General Assembly and may be changed by future constitutional amendments. Direct obligations of the State include, for example, special obligation bonds issued by the OBA and the Treasurer of State that are paid from GRF appropriations, but exclude bonds such as highway bonds that are paid from highway user receipts.

More detailed information on the State's long-term debt, including changes during the year, can be found in NOTES 10 through 13 and NOTE 15 of the financial statements.

Conditions Expected to Affect Future Operations

For the past two years, Ohio's economy has been in a recession that has been characterized by layoffs and falling corporate profits. Through December 2002, actual tax revenues for fiscal year 2003 continued to lag behind the Office of Budget and Management's projections for fiscal year 2003. In addition to increasing demands for more government spending on human services programs such as Medicaid, in response to the weakened economy, the State's personal income, corporate franchise, and sales tax revenues have been unable to reach projected levels of collections.

The Ohio Constitution prohibits the State from borrowing money to fund operating expenditures in the General Revenue Fund (GRF). Therefore, by law, the GRF's budget must be balanced so that appropriations do not exceed available cash receipts and cash balances for the current fiscal year.

In light of projected revenue shortfalls for the General Fund in fiscal year 2003, the State has implemented the following measures to help ensure fund balance remains positive, as of June 30, 2003.

On July 1, 2002, Governor Taft through Executive Order 2002-08T ordered \$374.8 million in reductions to GRF appropriations for fiscal year 2003. For some agencies, the budget cuts represent up to 15 percent of their originally approved appropriation levels. The executive order also directed state agencies to limit hiring to essential employees and contract positions, to reduce travel expenses, and to forego major purchases, remodeling, renovations and other purchases that had not yet been contracted. The executive order did not cut fiscal year 2003 appropriations for the basic aid component of primary and secondary education, entitlements, debt service, property tax rollbacks, homestead exemptions, tangible personal property tax exemptions, and pension payments by the Treasurer of State.

Later, on January 22, 2003, Governor Taft ordered state departments to trim their budgets by an average of 2.5 percent to achieve \$121 million in GRF spending reductions for fiscal year 2003.

Additionally, Senate Bill 261, which was enacted in June 2002, mandated \$41.4 million in GRF budget reductions for fiscal year 2003, including \$30 million in administrative costs at the Department of Education, \$10 million at the Department of Rehabilitation and Correction, and \$1.4 million for the Multi-Agency Radio Communications System. Through Senate Bill 261, the General Assembly also approved a 31-cent increase in the cigarette tax to 55 cents a pack, effective July 1, 2002, to enhance future revenues for the General Fund.

Finally, if needed by the General Fund for spending in fiscal year 2003, Senate Bill 261 contains provisions that allow OBM to reallocate up to \$427.9 million designated in the fund for budget stabilization purposes, as of June 30, 2002, on the budgetary basis of accounting, and to transfer up to an additional \$285 million from tobacco settlement revenues in the Special Revenue Fund.

Contacting the Ohio Office of Budget and Management

This financial report is designed to provide the State's citizens, taxpayers, customers, and investors and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. Questions regarding any of the information provided in this report or requests for additional financial information should be addressed to the Ohio Office of Budget and Management, Financial Reporting Section, 30 East Broad Street, 34th Floor, Columbus, Ohio 43215-3457.

[THIS PAGE LEFT BLANK INTENTIONALLY]

STATE OF OHIO
RECONCILIATION OF THE GOVERNMENTAL FUNDS
BALANCE SHEET TO THE STATEMENT OF NET ASSETS
JUNE 30, 2002
(dollars in thousands)

Total Fund Balances for Governmental Funds..... **\$ 4,548,538**

Total net assets reported for governmental activities in the Statement of Net Assets is different because:

Capital assets used in governmental activities are not financial resources, and therefore, are not reported in the funds. Those assets consist of:

Infrastructure, net of \$24 accumulated depreciation.....	16,639,382
Land.....	1,479,858
Buildings and Improvements, net of \$1,042,555 accumulated depreciation.....	1,886,367
Land Improvements, net of \$108,422 accumulated depreciation.....	87,207
Machinery and Equipment, net of \$258,862 accumulated depreciation.....	102,831
State Vehicles, net of \$98,017 accumulated depreciation.....	121,077
Construction-in-Progress.....	1,302,502
	<u>21,619,224</u>

Some of the State's revenues are collected after year-end but are not available soon enough to pay for the current period's (within 60 days of year-end) expenditures, and therefore, are deferred in the funds.

Taxes Receivable.....	87,355
Intergovernmental Receivable.....	304,225
Other Receivables:	
Accounts.....	8,335
Interest.....	1,342
	<u>401,257</u>

Unamortized bond issue costs are not financial resources, and therefore, are not reported in the funds.

6,607

The following liabilities are not due and payable in the current period, and therefore, are not reported in the funds.

Accrued Liabilities:	
Interest Payable.....	(88,092)
Other	(3,253)
Intergovernmental Payable.....	(19,689)
Payable to Component Units.....	(508)
Refund and Other Liabilities.....	(17,564)
Bonds and Notes Payable:	
General Obligation Bonds.....	(3,771,129)
Revenue Bonds.....	(297,638)
Special Obligation Bonds.....	(4,389,102)
Certificates of Participation.....	(9,900)
Other Noncurrent Liabilities:	
Compensated Absences.....	(381,929)
Capital Leases Payable.....	(3,933)
Litigation Liabilities.....	(30,000)
Liability for Escheat Property.....	(95,819)
	<u>(9,108,556)</u>

Total Net Assets of Governmental Activities..... **\$ 17,467,070**

The notes to the financial statements are an integral part of this statement.

STATE OF OHIO
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS
TO THE STATEMENT OF ACTIVITIES
FOR THE FISCAL YEAR ENDED JUNE 30, 2002
(dollars in thousands)

Net Change in Fund Balances -- Total Governmental Funds.....	\$ (1,545,681)
Change in Inventories.....	105
	<u>(1,545,576)</u>

The change in net assets reported for governmental activities in the Statement of Activities is different because:

Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period.

Capital Outlay Expenditures.....	786,744	
Depreciation Expense.....	<u>(152,807)</u>	
Excess of Capital Outlay Over Depreciation Expense.....		<u>633,937</u>

Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the Statement of Net Assets. In the current period, proceeds were received from:

General Obligation Bonds.....	(975,000)	
Revenue Bonds.....	(100,000)	
Special Obligation Bonds.....	(125,000)	
Refunding Bonds, including Bond Premium/Discount, Net.....	(341,451)	
Premiums and Discounts, net:		
General Obligation Bonds.....	(28,544)	
Revenue Bonds.....	(5,451)	
Special Obligation Bonds.....	<u>(2,536)</u>	
Total Bond Proceeds.....		<u>(1,577,982)</u>

Repayment of long-term debt is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the Statement of Net Assets. In the current year, these amounts consist of:

<i>Debt Principal Retirement:</i>		
General Obligation Bonds.....	280,305	
Revenue Bonds.....	25,750	
Special Obligation Bonds.....	474,951	
Certificates of Participation.....	2,405	
Capital Lease Payments.....	789	
Payments to Bond Refunding Agent.....	<u>317,320</u>	
Total Long-Term Debt Repayment.....		<u>1,101,520</u>

Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in the governmental funds.	<u>105,019</u>
---	----------------

The notes to the financial statements are an integral part of this statement.

Some expenses reported in the Statement of Activities are not reported as expenditures in the governmental funds. Under the modified accrual basis of accounting used in the governmental funds, expenditures are not recognized for transactions that are not normally paid with expendable available financial resources. In the Statement of Activities, however, which is presented on the accrual basis, expenses and liabilities are reported regardless of when financial resources are available. In addition, interest on long-term debt is not recognized under the modified accrual basis of accounting until due, rather than as it accrues. This adjustment combines the changes in the following balances:

<i>Increase in Bond Issue Costs Included in Other Assets</i>	6,607	
<i>Increase in Accrued Interest and Other Accrued Liabilities</i>	(21,782)	
<i>Increase in Payable to Component Units</i>	(508)	
<i>Amortization of Bond Premiums/Accretion of Bond Discount, Net</i>	6,566	
<i>Increase in Intergovernmental Payables</i>	(7,891)	
<i>Increase in Compensated Absences</i>	(20,351)	
<i>Decrease in Liabilities for Judgments, Claims, and Settlements</i>	47,783	
<i>Increase in Litigation Liabilities</i>	(10,000)	
<i>Increase in Liability for Escheat Property</i>	(1,883)	
	<hr/>	
<i>Total additional expenditures</i>		<hr/> <i>(1,459)</i>
<i>Change in Net Assets of Governmental Activities</i>		<hr/> <i>\$ (1,284,541)</i> <hr/>

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the State of Ohio, as of June 30, 2002, and for the year then ended, conform with generally accepted accounting principles (GAAP) as applied to governments. The Governmental Accounting Standards Board (GASB) is the standard-setting body for establishing governmental accounting and financial reporting principles, which are included in the GASB's *Codification of Governmental Accounting and Financial Reporting Standards*. The State's significant accounting policies are as follows.

A. Financial Reporting Entity

The State of Ohio's primary government includes all funds, elected officials, departments and agencies, bureaus, boards, commissions, and authorities that make up the State's legal entity. Component units, legally separate organizations for which the State's elected officials are financially accountable, also comprise, in part, the State's reporting entity. Additionally, other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete should be included in a government's financial reporting entity.

GASB Statement No. 14, *The Financial Reporting Entity*, defines financial accountability. The criteria for determining financial accountability include the following circumstances:

appointment of a voting majority of an organization's governing authority and the ability of the primary government to either impose its will on that organization or the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the primary government, or

an organization is fiscally dependent on the primary government.

Information on how to obtain financial statements for the State's component units that do issue their own separately audited financial reports is available from the Ohio Office of Budget and Management.

1. Blended Component Units

The Ohio Building Authority and the State Highway Patrol Retirement System are legally separate organizations that provide services entirely, or almost entirely, to the State or otherwise exclusively, or almost exclusively, benefit the State. Therefore, the State reports these organizations' balances and transactions as though they were part of the primary government using the blending method.

2. Discretely Presented Component Units

The component units' columns in the basic financial statements include the financial data of the organizations listed below. The separate discrete column labeled, "Component Units," emphasizes these organizations' separateness from the State's primary government. Officials of the primary government appoint a voting majority of each organization's governing board.

The primary government has the ability to impose its will on the following organizations by modifying or approving their respective budgets.

- School Facilities Commission
- Arts and Sports Facilities Commission
- SchoolNet Commission

The following organizations impose or potentially impose financial burdens on the primary government.

Ohio Water Development Authority

- Ohio State University
- University of Cincinnati
- Ohio University
- Miami University
- University of Akron
- Bowling Green State University
- Kent State University
- University of Toledo
- Cleveland State University
- Youngstown State University
- Wright State University
- Shawnee State University
- Central State University

Medical College of Ohio at Toledo

- Terra State Community College
- Columbus State Community College
- Clark State Community College
- Edison State Community College
- Southern State Community College
- Washington State Community College
- Cincinnati State Community College
- Northwest State Community College
- Owens State Community College

3. Joint Ventures and Related Organizations

As discussed in more detail in NOTE 18, the State participates in several joint ventures and has related organizations. The State does not include the financial activities of these organizations in its financial statements, in conformity with GASB Statement No. 14.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

B. Basis of Presentation

Government-wide Statements — The Statement of Net Assets and the Statement of Activities display information about the primary government (the State) and its component units. These statements include the financial activities of the overall government, except for fiduciary activities. Fiduciary funds of the primary government and component units that are fiduciary in nature are reported only in the statements of fiduciary net assets and changes in fiduciary net assets.

For the government-wide financial statements, eliminations have been made to minimize the double counting of internal activities. These statements distinguish between the *governmental* and *business-type activities* of the State. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange transactions. Business-type activities are financed in whole, or in part, by fees charged to external parties for goods or services.

The Statement of Net Assets reports all financial and capital resources using the economic resources measurement focus and the accrual basis of accounting. The State presents the statement in a format that displays *assets less liabilities equal net assets*. *Net assets* is displayed in three components:

The *Invested in Capital Assets, Net of Related Debt* component consists of capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds or other borrowings that are attributable to the acquisition, construction, or improvement of those assets. The portion of debt attributable to significant unspent related debt proceeds at year-end are not included in the calculation of this net assets component.

The *Restricted Net Assets* component represents net assets with constraints placed on their use that are either 1.) externally imposed by creditors, grantors, contributors, or laws or regulations of other governments or 2.) imposed by law through constitutional provisions or enabling legislation. For component units with permanent endowments, restricted net assets are displayed in two additional components — expendable and nonexpendable. Nonexpendable net assets are those that are required to be retained in perpetuity.

The *Unrestricted Net Assets* component consists of net assets that do not meet the definition of the preceding two components.

The Statement of Activities presents a comparison between direct expenses and program revenues for each function of the State's governmental activities and for the different business-type activities of the State. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular program or function. Centralized expenses have been included in direct expenses. Indirect expenses have not been allocated to the programs or functions reported in the Statement of Activities.

Generally, the State does not incur expenses for which it has the option of first applying restricted or unrestricted resources for their payment.

Program revenues include licenses, permits and other fees, fines, forfeitures, charges paid by the recipients of goods or services offered by the programs, and grants, contributions, and investment earnings that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all tax, tobacco settlement, unrestricted investment income, escheat property revenues, federal grants, and state assistance are presented as general revenues.

Fund Financial Statements — The fund financial statements provide information about the State's funds, including the fiduciary funds and blended component units. Separate statements for each fund category — governmental, proprietary, and fiduciary — are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental funds are aggregated and reported as nonmajor funds.

Governmental fund types include the General, special revenue, debt service, and capital projects funds. The proprietary funds consist of enterprise funds. Fiduciary fund types include pension trust, investment trust, private-purpose trust, and agency funds.

Operating revenues for the State's proprietary funds mainly consist of charges for sales and services, premium and assessment income, and revenue from the federal government for extended unemployment benefits when these revenues result from exchange transactions associated with the principal activity of the respective enterprise fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Investment income is also reported as operating income for the Unemployment Compensation Fund and Tuition

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Trust Authority Fund since this revenue source provides significant funding for the payment of unemployment compensation benefits and tuition benefits, respectively. Nonoperating revenues for the proprietary funds result from nonexchange transactions or ancillary activities; nonoperating revenues are primarily comprised of investment earnings and federal operating grants.

Proprietary fund operating expenses consist of expenses for the cost of sales and services, administration, premium dividend reductions and refunds, bonuses and commissions, prizes, benefits and claims, and depreciation. Nonoperating expenses principally consist of interest expense on debt and the amortization of discount on deferred lottery prize liabilities, which is reported under "Other" nonoperating expenses.

The State reports the following major governmental funds:

General — The General Fund, the State's primary operating fund, accounts for resources of the general government, except those required to be accounted for in another fund.

Job, Family and Other Human Services Special Revenue Fund — This fund accounts for public assistance programs primarily administered by the Department of Job and Family Services, which provides financial assistance, services, and job training to those individuals and families who do not have sufficient resources to meet their basic needs.

Education Special Revenue Fund — This fund accounts for programs administered by the Department of Education, the Ohio Board of Regents, and other various state agencies, which prescribe the State's minimum educational requirements and which provide funding and assistance to local school districts for basic instruction and vocation and technical job training and to the State's colleges and universities for post-secondary education.

Highway Operating Special Revenue Fund — This fund accounts for programs administered by the Department of Transportation, which is responsible for the planning and design, construction, and maintenance of Ohio's highways, roads, and bridges and for Ohio's public transportation programs.

Revenue Distribution Special Revenue Fund — This fund accounts for tax relief and aid to local government programs, which derive funding from tax and other revenues levied, collected, and designated by the State for these purposes.

The State reports the following major proprietary funds:

Workers' Compensation Enterprise Fund — This fund accounts for the operations of the Ohio Bureau of Workers' Compensation and the Ohio Industrial Commission, which provide workers' compensation insurance services.

Lottery Commission Enterprise Fund — This fund accounts for the State's lottery operations.

Unemployment Compensation Enterprise Fund — This fund, which is administered by the Ohio Department of Job and Family Services, accounts for unemployment compensation benefit claims.

Ohio Building Authority Enterprise Fund — This fund accounts for the Authority's local government office building lease operations and for the maintenance of all government office buildings owned or leased by the Authority.

Tuition Trust Authority Enterprise Fund — This fund accounts for the operations of the Ohio Tuition Trust Authority, including the sale of tuition credits under its guaranteed return option program.

Liquor Control Enterprise Fund — This fund accounts for the State's liquor sales operations of the Ohio Department of Commerce's Division of Liquor Control.

Underground Parking Garage Enterprise Fund — This fund accounts for the operations of the State's underground parking facilities at Capitol Square in Columbus.

Office of Auditor of State Enterprise Fund — This fund accounts for the operations of the Ohio Auditor of State's Office, which provides government audit and management advisory services to Ohio's public offices.

The State reports the following fiduciary fund types:

Pension Trust Fund — The State Highway Patrol Retirement System Pension Trust Fund accounts for resources that are required to be held in trust for members and beneficiaries of the defined benefit plan. The financial statements for the State Highway Patrol Retirement System Pension Trust Fund are presented for the fiscal year ended December 31, 2001.

Private-Purpose Trust Fund — The Private-Purpose Trust Fund accounts for trust arrangements under

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

which principal and income benefit participants in the Variable College Savings Plan, which is administered by the Tuition Trust Authority.

Investment Trust Fund — The STAROhio Investment Trust Fund accounts for the state-sponsored external investment pool, which the Treasurer of State administers for local government participants.

Agency Funds — These funds account for the receipt, temporary investment, and remittance of fiduciary resources held on behalf of individuals, private organizations, and other governments.

Component Units Funds — The State reports the following major component unit funds:

The *School Facilities Commission* is a discretely presented governmental component unit that uses special revenue fund reporting.

The *Ohio Water Development Authority*, *Ohio State University*, and *University of Cincinnati* funds are business-type activities that use proprietary fund reporting. The financial statements for the Ohio Water Development Authority are presented for the fiscal year ended December 31, 2001.

C. Measurement Focus and Basis of Accounting

Government-wide, Proprietary Fund, and Fiduciary Fund Financial Statements — The State reports the government-wide financial statements and the proprietary fund and fiduciary fund financial statements using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned, and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place.

For revenue arising from exchange transactions (i.e., charges for goods and services), the State defers revenue recognition when resources are received in advance of the exchange.

Nonexchange transactions, in which the State gives (or receives) value without directly receiving (or giving) equal value in exchange, include derived taxes, grants, and entitlements.

Under the accrual basis, the State recognizes assets from derived tax revenues (e.g., personal income, sales, motor vehicle fuel taxes) in the fiscal year when the exchange transaction on which the tax is imposed occurs or when the resources are received, whichever occurs first. The State recognizes derived tax revenues, net of estimated refunds and estimated uncollectible amounts, in the same period

that the assets are recognized, provided that the underlying exchange transaction has occurred.

Revenue from grants and entitlements is recognized in the fiscal year in which all eligibility requirements have been satisfied. Resources transmitted in advance of the State meeting eligibility requirements are reported as deferred revenue.

Investment income includes the net increase (decrease) in the fair value of investments.

As permitted by GAAP, all governmental and business-type activities and enterprise funds have elected not to apply Financial Accounting Standards Board Statements and Interpretations issued after November 30, 1989.

Governmental Fund Financial Statements — The State reports governmental funds using the current financial resources measurement focus and the modified accrual basis of accounting. Under this method, revenues are recognized when measurable and available. The State considers all revenues reported in the governmental funds to be available when the revenues are collected within 60 days after year-end or soon enough thereafter to be used to pay liabilities of the current period.

Significant revenue sources susceptible to accrual under the modified accrual basis of accounting include:

- Personal income taxes
- Sales and use taxes
- Motor vehicle fuel taxes
- Charges for goods and services
- Federal government grants
- Investment income

The State recognizes assets from derived tax revenues (e.g., personal income, sales, motor vehicle fuel taxes) in the fiscal year when the exchange transaction on which the tax is imposed occurs or when the resources are received, whichever occurs first. The State recognizes derived tax revenues, net of estimated refunds and estimated uncollectible amounts, in the same period that the assets are recognized, provided that the underlying exchange transaction has occurred and the revenues are collected during the 60-day availability period.

The governmental funds recognize federal government revenue in the period when all applicable eligibility requirements have been met and resources are available. Resources transmitted in advance of the

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

State meeting eligibility requirements are reported as deferred revenue. Also, the State defers revenue recognition for reimbursement-type grant programs if the reimbursement is not received during the availability period (within 60-days of year-end or soon enough thereafter to be used to pay liabilities of the current period).

For revenue arising from exchange transactions (i.e., charges for goods and services), the State defers revenue recognition when resources are received in advance of the exchange.

Investment income includes the net increase (decrease) in the fair value of investments.

Licenses, permits, fees, and certain other miscellaneous revenues are not susceptible to accrual because generally they are not measurable until received in cash. The "Other" revenue account is comprised of refunds, reimbursements, recoveries, and other miscellaneous income.

Expenditures are recorded when the related fund liability is incurred, except for principal and interest on general long-term debt, capital lease obligations, compensated absences, and claims and judgments. The governmental funds recognize expenditures for these liabilities to the extent they have matured or will be liquidated with expendable, available financial resources.

General capital asset acquisitions are reported as expenditures in the governmental funds. Proceeds from general long-term debt issuances, including refunding bond proceeds, bond premiums, and acquisitions under capital leases are reported as other financing sources while bond discounts and payments to bond escrow agents are reported as other financing uses.

D. Budgetary Process

As the Ohio Revised Code requires, the Governor submits biennial operating and capital budgets to the General Assembly. All proposed expenditures for the State and estimated revenues and borrowings for a biennium comprise the budget, which includes those funds of the State subject to appropriation pursuant to state law.

The General Assembly enacts the budget through passage of specific departmental line-item appropriations, the legal level of budgetary control. Line-item appropriations are established within funds by program or major object of expenditure. The Governor may veto any item in an appropriation bill. Such vetoes are subject to legislative override.

Biennially, the General Assembly approves operating and capital appropriations. The legislature specifies operating appropriations in annual amounts and capital appropriations in two-year amounts.

The State's Controlling Board, comprised of six members of the General Assembly and the director of the Office of Budget and Management (OBM) or an employee of OBM designated by the director, can transfer or increase a line-item appropriation within the limitations set under Sections 127.14 and 131.35, Ohio Revised Code. As provided by Sections 127.14 and 127.16, Ohio Revised Code, the Board has delegated to the director of OBM authority to approve transfers within a state agency among items of appropriations for the same fiscal year not to exceed a cumulative fiscal year transfer of \$50,000 (or \$75,000 for certain institutional departments) from each item of appropriation. The OBM director cannot make transfers for the purpose of effecting new or changed levels of program service not authorized by the General Assembly.

All governmental funds are budgeted except the following activities within the debt service fund type:

- Vietnam Conflict Compensation
- General Obligations
- Economic Development Revenue Bonds
- Transportation Certificates of Participation
- Higher Education Facilities Special Obligations
- Mental Health Facilities Special Obligations
- Parks and Recreation Facilities Special Obligations
- School Building Program Special Obligations
- Infrastructure Bank Revenue Bonds
- Ohio Building Authority Special Obligations

For budgeted funds, the State's Central Accounting System controls expenditures by appropriation line-item, so at no time can expenditures exceed appropriations and financial-related legal compliance is assured. The State uses the modified cash basis of accounting for budgetary purposes.

As an extension of formal budgetary integration in the accounting system, the State employs encumbrance accounting, under which purchase orders, contracts, and other commitments for expenditures are recorded as a reserve of the applicable appropriations. At fiscal year end, the State reports outstanding encumbrances in the General, special revenue, and capital projects funds as reservations of fund balance for expenditure in subsequent years.

Operating encumbrances are generally canceled five months after the fiscal year-end while capital

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

encumbrances are generally canceled two years after the biennial period for which they were appropriated. Unencumbered appropriations lapse at the end of the biennium budget period.

The *Detailed Appropriation Summary by Fund Report*, which is available for public inspection at the Ohio Office of Budget and Management, provides a more comprehensive accounting of activity on the budgetary basis at the legal level of budgetary control.

In the *Statement of Revenues, Expenditures and Changes in Fund Balances — Budget and Actual (Non-GAAP Budgetary Basis) — General Fund and Major Special Revenue Funds*, the State reports budgeted revenues and other financing sources and uses for the General Fund only; the State does not budget revenue and other financing sources and uses for the major special revenue funds or its budgeted nonmajor governmental funds.

While the State formally estimates revenue and other financing sources and uses for the General Revenue Fund, the largest budgetary operating fund reported in the General Fund, the State does not have updated, budgeted revenue and other financing sources and uses amounts for other budgetary funds also included in the General Fund. Therefore, the State has included “actual” revenue and other financing sources and uses amounts under the “Original” and “Final” budget columns presented on the budgetary basis financial statement for the other budgetary funds included in the General Fund.

Additionally, in the non-GAAP budgetary basis financial statement, “actual” budgetary expenditures include cash disbursements against the current fiscal year’s appropriations and outstanding encumbrances, as of June 30, 2002, that were committed during the current fiscal year. Encumbrance reversions represent lapses of prior years’ appropriations.

The Variable College Savings Plan Private-Purpose Trust Fund, State Highway Patrol Retirement System Pension Trust Fund, and the STAROhio Investment Trust Fund are not legally required to adopt budgets. For budgeted proprietary funds, the State is not legally required to report budgetary data and comparisons for these funds. Also, the State does not present budgetary data for its discretely presented component units.

Because the State budgets on a modified cash basis of accounting, which differs from GAAP, NOTE 3 presents a reconciliation of the differences between

the GAAP basis and non-GAAP budgetary basis of reporting.

E. Cash Equity with Treasurer and Cash and Cash Equivalents

Cash equity with Treasurer consists of pooled demand deposits and investments carried at fair value. The State’s cash pool under the Treasurer of State’s administration has the general characteristics of a demand deposit account whereby additional cash can be deposited at any time and can also be effectively withdrawn at any time, within certain budgetary limitations, without prior notice or penalty.

Cash and cash equivalents include amounts on deposit with financial institutions and cash on hand. The cash and cash equivalents account also includes investments with original maturities of three months or less from the date of acquisition for the Bureau of Workers’ Compensation, Lottery Commission, and Tuition Trust Authority enterprise funds and the Medical College of Ohio and the Columbus State Community College component unit funds.

Cash equity with Treasurer and cash and cash equivalents, including the portions reported under “Restricted Assets,” are considered to be cash equivalents, as defined in GASB Statement No. 9, for purposes of the Statement of Cash Flows.

Additional disclosures on the State’s deposits can be found in NOTE 4.

F. Investments

Investments include long-term investments that may be restricted by law or other legal instruments. With the exception of certain money market investments, which have remaining maturities at the time of purchase of one year or less and are carried at amortized cost, and holdings in the State Treasury Asset Reserve of Ohio (STAROhio) investment pool, the State reports investments at fair value based on quoted market prices. STAROhio operates in a manner consistent with Rule 2a7 of the Investment Company Act of 1940; investments in the 2a7-like pool are reported at amortized cost (which approximates fair value). The colleges and universities report investments received as gifts at their fair value on the donation date.

The primary government does not manage or provide investment services for investments reported in the Agency Fund that are owned by other, legally separate entities that are not part of the State of Ohio’s reporting entity.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Additional disclosures on the State's investments can be found in NOTE 4.

G. Taxes Receivable

Taxes receivable represent amounts due to the State at June 30, which will be collected sometime in the future. In the government-wide financial statements, revenue has been recognized for the receivable. In the fund financial statements only the portion of the receivable collected during the 60-day availability period has been recognized as revenue while the remainder is recorded as deferred revenue. Additional disclosures on taxes receivable can be found in NOTE 5A.

H. Intergovernmental Receivable

The intergovernmental receivable balance is primarily comprised of amounts due from the federal government for reimbursement-type grant programs. Advances of resources to recipient local governments before eligibility requirements have been met under government-mandated and voluntary nonexchange programs and amounts due for exchanges of State goods and services with other governments are also reported as intergovernmental receivables. Additional details on the intergovernmental receivable balance can be found in NOTE 5B.

I. Inventories

Inventories are valued at cost. Principal inventory cost methods applied include first-in/first-out, average cost, moving-average, and retail.

In the governmental fund financial statements, the State recognizes the costs of material inventories as expenditures when purchased. Inventories do not reflect current appropriable resources in the governmental fund financial statements, and therefore, the State reserves an equivalent portion of fund balance.

J. Restricted Assets

The primary government reports assets restricted for payment of workers' compensation benefits, deferred prize awards (Ohio Lotto), and tuition benefits in the enterprise funds for the Bureau of Workers' Compensation, Lottery Commission, and Tuition Trust Authority, respectively.

Generally, the component unit funds hold assets in trust under bond covenants or other financing arrangements that legally restrict the use of these assets.

K. Capital Assets

Primary Government

The State reports capital assets purchased with governmental fund resources in the government-wide financial statements at historical cost, or at estimated historical cost when no historical records exist. Donated fixed assets are valued at their estimated fair value on the donation date. The State does not report capital assets purchased with governmental fund resources in the fund financial statements. Governmental capital assets are reported net of accumulated depreciation, except for land, construction-in-progress, transportation infrastructure assets, and individual works of art and historical treasures. Infrastructure assets are reported using the "modified approach," as discussed below, and therefore are not depreciable. Individual works of art and historical treasures are considered to be inexhaustible, and therefore, are not depreciable.

The State reports capital assets purchased with enterprise fund resources and fiduciary fund resources in the government-wide and the fund financial statements at historical cost, or at estimated historical cost when no historical records exist. Donated fixed assets are valued at their estimated fair value on the donation date. Capital assets are reported net of accumulated depreciation.

The State has elected to capitalize its transportation infrastructure assets, defined as bridges, general highways, and priority highways, using the modified approach. Under this approach, the infrastructure assets are not depreciated because the State has committed itself to maintaining the assets at a condition level that the Ohio Department of Transportation (ODOT) has determined to be adequate to meet the needs of the citizenry. Costs of maintaining the bridge and highway infrastructure are not capitalized. New construction that represents additional lane-miles of highway or additional square-footage of bridge deck area and improvements that add to the capacity or efficiency of an asset are capitalized.

ODOT maintains an inventory of its transportation infrastructure capital assets, and conducts annual condition assessments to establish that the condition level that the State has committed itself to maintaining is, in fact, being achieved. ODOT also estimates the amount that must be spent annually to maintain the assets at the desired condition level.

For its other types of capital assets, the State does not capitalize the costs of normal maintenance and repairs that do not add to an asset's value or materially extend its useful life. Costs of major improve-

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

ments are capitalized. Interest costs associated with the acquisition of capital assets purchased using governmental fund resources are not capitalized; while those associated with acquisitions purchased using enterprise and fiduciary fund resources are capitalized.

The State does not capitalize collections of works of art or historical treasures that can be found at the Governor’s residence, Malabar Farm (i.e., Louis Bromfield estate), which the Ohio Department of Natural Resources operates, the Ohio Arts Council, the State Library of Ohio, and the Capitol Square Review and Advisory Board for the following reasons:

the collection is held for public exhibition, education, or research in furtherance of public service rather than for financial gain.

the collection is protected, kept unencumbered, cared for, and preserved.

the collection is subject to an organizational policy that requires the proceeds from sales of collection items to be used to acquire other items for collections.

The State has established the following capitalization thresholds:

Buildings	\$ 15,000
Building Improvements.....	100,000
Land	All, regardless of cost
Land Improvements	15,000
Machinery and Equipment	15,000
State Vehicles	15,000
Infrastructure:	
Highway Network	500,000
Bridge Network.....	500,000
Park and Natural Resources Network	All, regardless of cost

For depreciable capital assets, the State applies the straight-line method over the following estimated useful lives:

Buildings	20-45 years
Land Improvements	10-25 years
Machinery and Equipment	2-15 years
State Vehicles	5-15 years
Park and Natural Resources Infrastructure Network.....	50 years

NOTE 8 contains additional disclosures about the primary government’s capital assets.

Discretely Presented Component Unit Funds

The discretely presented component unit funds value all capital assets at cost and donated fixed assets at estimated fair value on the donation date. Capital assets are depreciated using the straight-line

method. Additional disclosures about the discretely presented component unit funds’ capital assets can be found in NOTE 8.

L. Noncurrent Liabilities

Government-wide Financial Statements — Liabilities whose average maturities are greater than one year are reported in two components — the amount due in one year and the amount due in more than one year. Additional disclosures as to the specific liabilities included in noncurrent liabilities can be found in NOTES 10 through 15.

Fund Financial Statements — Governmental funds recognize noncurrent liabilities to the extent they have matured or will be liquidated with expendable, available financial resources.

The proprietary funds and component unit funds report noncurrent liabilities expected to be financed from their operations.

M. Compensated Absences

Employees of the State’s primary government earn vacation leave, sick leave, and personal leave at various rates within limits specified under collective bargaining agreements or under law. Generally, employees accrue vacation leave at a rate of 3.1 hours every two weeks for the first five years of employment, up to a maximum rate of 9.2 hours every two weeks after 25 years of employment. Employees may accrue a maximum of three years vacation leave credit. At termination or retirement, the State pays employees, at their full rate, 100 percent of unused vacation leave, personal leave, and, in certain cases, compensatory time and 50 to 55 percent of unused sick leave.

Such leave is liquidated in cash, under certain restrictions, either annually in December, or at the time of termination from employment.

For the governmental funds, the State reports the compensated absences liability as a fund liability (included in the “Accrued Liabilities” account as a component of wages payable) to the extent it will be liquidated with expendable, available financial resources. For the primary government’s proprietary funds and its discretely presented component unit funds, the State reports the compensated absences liability as a fund liability included in the “Refunds and Other Liabilities” account.

The State’s primary government accrues vacation, compensatory time, and personal leaves as liabilities when an employee’s right to receive compensation is attributable to services already rendered and it is

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

probable that the employee will be compensated through paid time off or some other means, such as at termination or retirement. Leave time that has been earned, but is unavailable for use as paid time off or as some other form of compensation because an employee has not met a minimum service time requirement, is accrued to the extent that it is considered to be probable that the conditions for compensation will be met in the future.

The State's primary government accrues sick leave using the vesting method. Under this method, the liability is recorded on the basis of leave accumulated by employees who are eligible to receive termination payments, as of the balance sheet date, and on leave balances accumulated by other employees who are expected to become eligible in the future to receive such payments.

Included in the compensated absences liability is an amount accrued for salary-related payments directly and incrementally associated with the payment of compensated absences upon termination. Such payments include the primary government's share of Medicare taxes.

For the colleges and universities, vacation and sick leave policies vary by institution.

N. Fund Balance

Fund balance reported in the governmental fund financial statements is classified as follows:

Reserved

Reservations represent balances that are not appropriate or are legally restricted for a specific purpose. Additional details on "Reserved for Other" balances are disclosed in NOTE 17.

Unreserved/Designated

Designations represent balances available for tentative management plans that are subject to change.

Unreserved/Undesignated

Unreserved/undesignated fund balances are available for appropriation for the general purpose of the fund.

O. Risk Management

The State's primary government is self-insured for claims under its traditional healthcare plan and for vehicle liability while it has placed public official fidelity bonding with a private insurer. The State self-funds tort liability and most property losses on a pay-as-you-go basis; however, selected state agencies have acquired private insurance for their property losses. While not the predominant participants, the State's primary government and its discretely presented component units participate in a public entity

risk pool, which is accounted for in the Bureau of Workers' Compensation Enterprise Fund, for the financing of their respective workers' compensation liabilities. These liabilities are reported in the governmental funds as an interfund payable and in the component unit funds as a payable to primary government (See NOTE 7).

P. Interfund Balances and Activities

Interfund transactions and balances have been eliminated from the government-wide financial statements to the extent that they occur within either the governmental or business-type activities. Balances between governmental and business-type activities are presented as internal balances and are eliminated in the total column. Revenues and expenses associated with reciprocal transactions within governmental or within business-type activities have not been eliminated.

In the fund financial statements, interfund activity within and among the three fund categories (governmental, proprietary, and fiduciary) is classified and reported as follows:

Reciprocal interfund activity is the internal counterpart to exchange and exchange-like transactions. This activity includes:

Interfund Loans — Amounts provided with a requirement for repayment, which are reported as interfund receivables in lender funds and interfund payables in borrower funds. When interfund loan repayments are not expected within a reasonable time, the interfund balances are reduced and the amount that is not expected to be repaid is reported as a transfer from the fund that made the loan to the fund that received the loan.

Interfund Services Provided and Used — Sales and purchases of goods and services between funds for a price approximating their external exchange value. Interfund services provided and used are reported as revenues in seller funds and as expenditures or expenses in purchaser funds. Unpaid amounts are reported as interfund receivables and payables in the fund balance sheets or fund statements of net assets.

Nonreciprocal interfund activity is the internal counterpart to nonexchange transactions. This activity includes:

Interfund Transfers — Flows of assets without equivalent flows of assets in return and without a requirement for repayment. In governmental funds, transfers are reported as other financing uses in the funds making transfers and as other financing sources in the funds receiving transfers.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Interfund Reimbursements — Repayments from funds responsible for particular expenditures or expenses to the funds that initially paid for them. Reimbursements are not displayed in the financial statements.

Details on interfund balances and transfers are disclosed in NOTE 7.

Q. Intra-Entity Balances and Activities

Balances due between the primary government and its discretely presented component units are re-

ported as receivables from component units or primary government and payables to component units or primary government. For each major component unit, the nature and amount of significant transactions with the primary government are disclosed in NOTE 7.

Resource flows between the primary government and its discretely presented component units are reported like external transactions (i.e., revenues and expenses).

NOTE 2 RESTATEMENTS AND CHANGES IN ACCOUNTING PRINCIPLES AND STANDARDS

A. Implementation of Recently Issued Accounting Pronouncements

For the year ended June 30, 2002, the State implemented the provisions of the following pronouncements of the Governmental Accounting Standards Board (GASB):

GASB Statement No. 34, *Basic Financial Statements—and Management’s Discussion and Analysis—for State and Local Governments*

GASB Statement No. 35, *Basic Financial Statements—and Management’s Discussion and Analysis—for Public Colleges and Universities*

GASB Statement No. 37, *Basic Financial Statements—and Management’s Discussion and Analysis—for State and Local Governments: Omnibus*

GASB Statement No. 38, *Certain Financial Statement Note Disclosures*

GASB Interpretation No. 6, *Recognition and Measurement of Certain Liabilities and Expenditures in Governmental Fund Financial Statements*

These new standards resulted in significant changes to the State’s financial statements and related notes for both the primary government and component units for the fiscal year ended June 30, 2002.

GASB Statement No. 34 establishes new accounting and financial reporting standards that fundamentally affect the presentation of a general purpose government’s basic financial statements and related required supplementary information.

GASB Statement No. 35 establishes new accounting and financial reporting standards for public colleges and universities within the financial reporting guidelines of GASB Statement No. 34. This standard has

been applied to the presentation of certain of the State’s component units’ basic financial statements.

GASB Statement No. 37 amends certain provisions of GASB Statement No. 34 and GASB Statement No. 21, *Accounting for Escheat Property*.

GASB Statement No. 38 establishes and modifies disclosure requirements related to the summary of significant accounting policies, actions taken to address violations of significant finance-related legal and contractual provisions, debt and lease obligations, short-term debt, disaggregation of receivable and payable balances, and interfund balances and transfers.

GASB Interpretation No. 6 clarifies the application of existing accounting standards for distinguishing the respective portions of certain liabilities that should be reported as governmental fund liabilities and as general long-term liabilities of a government.

In May 2002, the GASB amended GASB Statement No. 14, *The Financial Reporting Entity*, and established additional guidance on the application of existing standards for the assessment of potential component units in determining a government’s financial reporting entity when it issued GASB Statement No. 39, *Determining Whether Certain Organizations Are Component Units*. The provisions of GASB Statement No. 39 are effective for financial statements presented for periods beginning after June 15, 2003. Management has not yet determined the impact that GASB Statement No. 39 will have on the State’s financial statements.

Restatements for the primary government and its component units resulting from the implementation of the new GASB accounting standards, corrections, fund reclassifications, changes in accounting principles, and changes in reporting entity are detailed in the following tables.

**NOTE 2 RESTATEMENTS AND CHANGES IN ACCOUNTING PRINCIPLES AND STANDARDS

Significant corrections to opening balances reported by the primary government include the following:

For the General Fund, the "Other" receivable balance reported, as of June 30, 2001, was increased by \$146.2 million to properly reflect a reduction in Medicaid expenditures resulting from outstanding rebates receivable from drug manufacturers under the Medicaid Program.

For the Highway Operating Fund, the opening accounts payable balance was increased \$19.5 million, since the liability was not properly identified subsequent to the year ended June 30,

2001. The opening intergovernmental receivable balance was also increased \$14.8 million for the portion of the accounts payable adjustment that qualified for federal reimbursement.

Fund balance totaling \$90.2 million reported for the governmental funds, as of June 30, 2001, has been reclassified and presented under the discretely presented nonmajor component unit columns as a change in reporting entity for the Arts and Sports Facilities Commission and SchoolNet Commission in the amounts of \$68.9 million and \$21.3 million, respectively.

For the School Facilities Commission Fund, the intergovernmental payable balance, as of June 30, 2002, was increased by \$561.5 million to properly report expenditures/expenses related to long-term funding

agreements with local school districts. The contracts commit the State to cover the costs of construction of facilities of the school districts once the districts have met certain eligibility requirements.

NOTE 3 GAAP versus NON-GAAP BUDGETARY BASIS

In the accompanying *Statement of Revenues, Expenditures and Changes in Fund Balances — Budget and Actual (Non-GAAP Budgetary Basis) — General Fund and Major Special Revenue Funds*, actual revenues, transfers-in, expenditures, encumbrances, and transfers-out reported on the non-GAAP budgetary basis do not equal those reported on the GAAP basis in the *Statement of Revenues, Expenditures and Changes in Fund Balances — Major Governmental Funds*.

This inequality results primarily from basis differences in the recognition of accruals, deferred revenue, interfund transactions, and loan transactions, and from timing differences in the budgetary basis of accounting for encumbrances. On the non-GAAP budgetary basis, the State recognizes encumbrances as expenditures in the year encumbered, while on the modified accrual basis, the State recognizes expenditures when goods or services are received regardless of the year encumbered.

Original budget amounts in the accompanying budgetary statements have been taken from the first complete appropriated budget for fiscal year 2002.

An appropriated budget is the expenditure authority created by appropriation bills that are signed into law and related estimated revenues. The original budget also includes actual appropriation amounts automatically carried over from prior years by law, including the automatic rolling forward of appropriations to cover prior-year encumbrances.

Final budget amounts represent original appropriations modified by authorized transfers, supplemental and amended appropriations, and other legally authorized legislative and executive changes applicable to fiscal year 2002, whenever signed into law or otherwise legally authorized.

For fiscal year 2002, no excess of expenditures over appropriations were reported in individual funds.

A reconciliation of the fund balances reported under the GAAP basis and budgetary basis for the General Fund and the major special revenue funds is presented on the following page.

NOTE 4 DEPOSITS AND INVESTMENTS

A. Legal Requirements

The deposit and investment policies of the Treasurer of State and the State Board of Deposit are governed by the Uniform Depository Act, Chapter 135, Ohio Revised Code, which requires state moneys to be maintained in one of the following three classifications:

Active Deposits — Moneys required to be kept in a cash or near-cash status to meet current demands. Such moneys must be maintained either as cash in the State's treasury or in one of the following: a commercial account that is payable or withdrawable, in whole or in part, on demand, a negotiable order of withdrawal account, a money market deposit account, or a designated warrant clearance account.

Inactive Deposits — Those moneys not required for use within the current two-year period of designation of depositories. Inactive moneys may be deposited or invested only in certificates of deposit maturing not later than the end of the current period of designation of depositories.

Interim Deposits — Those moneys not required for immediate use, but needed before the end of the current period of designation of depositories. Interim deposits may be deposited or invested in the following instruments:

Bonds, notes, or other obligations of or guaranteed by the United States, or those for which the faith of the United States is pledged for the payment of principal and interest;

Bonds, notes, debentures, or other obligations or securities issued by any federal government agency, or the Export-Import Bank of Washington;

Repurchase agreements in the securities enumerated above;

Interim deposits in the eligible institutions applying for interim moneys;

Bonds and other obligations of the State of Ohio;

The Treasurer of State's investment pool;

Linked deposits, reduced-rate deposits at financial institutions that provide reduced-rate loans to small businesses, as authorized under Section 135.63, Ohio Revised Code;

Agricultural linked deposits, reduced-rate deposits at financial institutions that provide reduced-rate loans to agricultural businesses, as authorized under Section 135.74, Ohio Revised Code;

Reverse repurchase agreements with any eligible financial institution that is a member of the Federal Reserve System or federal home loan bank, or any recognized U.S. government securities dealer;

Securities lending agreements with any eligible financial institution that is a member of the federal reserve system or federal home loan bank, or any recognized U.S. government securities dealer;

Commercial paper, rated in one of the two highest rating categories by two nationally recognized rating agencies and not exceeding five percent of the investment portfolio;

Bankers' acceptances maturing in 270 days or less and not exceeding 10 percent of the investment portfolio;

Debt of domestic corporations and foreign nations diplomatically recognized by the United States, rated investment grade by nationally recognized rating agencies and, in the aggregate, not exceeding five percent of the investment portfolio; and

No-load money market funds consisting of U.S. government and agency obligations and repurchase agreements secured by such obligations.

The primary government's deposits must be held in insured depositories approved by the State Board of Deposit and must be fully collateralized.

In some cases, deposit and investment policies of certain individual funds and component units are established by Ohio Revised Code provisions other than the Uniform Depository Act and by bond trust agreements. In accordance with applicable statutory authority, the State Highway Patrol Retirement System Pension Trust Fund, the Tuition Trust Authority Enterprise Fund, the Workers' Compensation Enterprise Fund, the Retirement Systems Agency Fund, and the higher education institutions may also invest in common and preferred stocks, domestic and foreign corporate/government bonds and notes, mortgage loans, limited partnerships, venture capital, real estate, and/or other investments.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

B. State-Sponsored Investment Pool

The Treasurer of State is the investment advisor and administrator of the State Treasury Asset Reserve of Ohio (STAROhio), a statewide external investment pool authorized under Section 135.45, Ohio Revised Code. STAROhio issues a stand-alone financial report, copies of which may be obtained by making a written request to: Director of Investments, Treasurer of State, 30 East Broad Street, 9th Floor, Columbus, Ohio 43215, or by calling (614) 466-2160.

C. Deposits

1. Primary Government

As of June 30, 2002, the carrying amount of deposits was (dollars in thousands) \$1,082,770, and the bank balance was \$1,193,470. Of the bank balance, \$167,129 was fully insured or collateralized with securities held by the primary government or its agent in the primary government's name (Category 1), \$971,455 was collateralized with securities held by the pledging financial institution's trust department or its agent in the primary government's name (Category 2), and \$54,886, although meeting legal collateralization requirements, was categorized as uninsured and uncollateralized (Category 3).

2. Component Units

As of June 30, 2002, the carrying amount of deposits was (dollars in thousands) \$590,080, and the bank balance was \$695,479. Of the bank balance, \$54,410 was fully insured or collateralized with securities held by the respective component units or their agents in the component unit's name (Category 1), \$543,224 was collateralized with securities held by the pledging financial institution's trust department or its agent in the respective component unit's name (Category 2), and \$97,845, although meeting legal collateralization requirements, was categorized as uninsured and uncollateralized (Category 3).

D. Investments

The State categorizes investments to give an indication of the levels of credit risk associated with the State's custodial arrangements at year-end. *Category 1* includes investments that are insured, registered, or held by the State or its agent in the State's name. *Category 2* includes uninsured and unregistered investments held by the counterparty's trust department or its agent in the State's name. *Category 3* includes uninsured and unregistered investments held by the counterparty, its trust department, or its agent, but not in the State's name.

Certain investments have not been categorized because the securities are not used as evidence of the investment. These uncategorized investments in-

clude ownership in mutual funds, real estate, venture capital and limited partnerships, direct mortgage loans, life insurance, investment contracts, and the deposit with the federal government. In conformity with Governmental Accounting Standards Board Statement No. 28, *Accounting and Financial Reporting for Securities Lending Transactions*, securities lent at year-end for cash collateral have not been categorized by custodial credit risk, while securities lent for securities collateral have been categorized.

The levels of credit risk assumed by the primary government and its discretely presented component units and the carrying amount and fair value of investments, as of June 30, 2002, are detailed in the tables on the following page.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

The total carrying amount of deposits and investments, as of June 30, 2002, reported for the primary government and its component units is (dollars in thousands) \$163,516,480. The total carrying amount of deposits and investments categorized and disclosed in this note is \$163,901,837. A reconciliation of the difference is presented in the table below.

E. Securities Lending Transactions

The Treasurer of State and the Bureau of Workers' Compensation (BWC) participate in securities lending programs for securities included in the "Cash Equity with Treasurer" and "Investments" accounts and the STAROhio program. Each lending program is administered by a custodial agent bank, whereby certain securities are transferred to an independent broker-dealer (borrower) in exchange for collateral. The State requires its custodial agents to ensure that the State's lent securities are collateralized at no less than 102 percent of market value. Consequently, as of June 30, 2002, the State had no credit exposure since the amount the State owed to borrowers exceeded the amount borrowers owed the State.

For loan contracts the Treasurer executes, not more than 10 percent of the State's cash and investment

portfolio, which is reported as "Cash Equity with Treasurer," can be lent to a single broker-dealer. For the STAROhio program, not more than 25 percent of the STAROhio investment pool may be lent at any one time, and not more than 10 percent of the investment pool may be subject to term loans in excess of one business day.

The State cannot sell securities received as collateral unless the borrower defaults. Consequently, these amounts are not reflected in the financial statements. The State invests cash collateral in short-term obligations, which have a weighted average maturity of 45 days or less and generally match the maturities of securities loans. Loan contracts do not provide any loss indemnification by securities lending agents in cases of borrower default; however, during fiscal year 2002, the State had not experienced any losses due to credit or market risk on securities lending activities.

During the fiscal year, the Treasurer and the STAROhio program lent U.S. government and agency obligations in exchange for collateral consisting of cash and/or other U.S. government obligations. The BWC lent fixed maturities and equity securities in exchange for cash, broker-provided, and letters of credit collateral.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

F. Derivatives

Derivatives are generally defined as a contract whose value depends on, or derives, from the values of an underlying asset, reference rate, or index.

During fiscal year 2002, the Bureau of Workers' Compensation Enterprise Fund held certain mortgage and asset-backed securities (included under the "U.S. Government and Agency Obligations" investment type in the amount of approximately \$5.4 billion at fair value, as of June 30, 2002), which the fund classified as derivatives. The overall return or yield on mortgage-backed securities depends on the interest amount collected over the life of the security and the change in the fair value. Although the Bureau will receive the full principal amount, if prepaid, the interest income that would have been collected during the remaining period to maturity is lost. Accordingly, the yields and maturities of mortgage-backed securities generally depend on when the underlying mortgage loan principal and interest are repaid. If the market rates fall below a mortgage loan's contractual rate, it is generally to the borrower's advantage to repay the existing loan and obtain new lower financing.

Through the use of international money managers, the Bureau of Workers' Compensation also entered

into various forward currency contracts to manage exposure to changes in foreign currency exchange rates on its foreign portfolio holdings. The international money managers may also enter into foreign currency exchange contracts to provide a quantity of foreign currency needed at a future time at the current exchange rates, if rates are expected to change dramatically. A forward exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated rate. Risk associated with such contracts includes movement in the value of foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. The fair value of the forward currency contracts payable by the Bureau was \$803 thousand, as of June 30, 2002.

Additionally, during the reporting period, the Ohio Public Employees Retirement System, Ohio Police and Fire Pension Fund, School Employees Retirement System of Ohio, and the State Teachers Retirement System of Ohio, the investments of which are held in the Treasurer of State's custody and are reported in the Retirement Systems Agency Fund, had investments in derivatives and similar debt and investment transactions. Specific information on the nature of the transactions and the reasons for entering into them can be found in each respective system's Comprehensive Annual Financial Report.

NOTE 5 RECEIVABLES

A. Taxes Receivables — Primary Government

The following table summarizes taxes receivable for the primary government (dollars in thousands).

	Governmental Activities				
	Major Governmental Funds			Nonmajor Governmental Funds	Total Primary Government
	General	Highway Operating	Revenue Distribution		
Current-Due Within One Year:					
Income Taxes	\$295,269	\$ —	\$ 42,350	\$ 147	\$ 337,766
Sales Taxes	597,481	—	28,655	1,380	627,516
Motor Vehicle Fuel Taxes	—	46,405	147,897	2,165	196,467
Public Utility Taxes	52,992	—	31,713	—	84,705
Other Taxes	—	7,200	—	1,831	9,031
	945,742	53,605	250,615	5,523	1,255,485
Noncurrent-Due in More Than One Year:					
Income Taxes	28,684	—	3,365	—	32,049
Taxes Receivable, Net.....	\$974,426	\$53,605	\$253,980	\$5,523	\$1,287,534

Current taxes receivable are expected to be collected in the next fiscal year while noncurrent taxes receivable are not expected to be collected until more than one year from the balance sheet date. As of June 30, 2002, approximately \$87.4 million of the net taxes receivable balance is also reported as deferred revenue on the governmental funds' balance sheet, of which \$78.2 million is reported in the General Fund and \$9.2 million is reported in the Revenue

Distribution Special Revenue Fund. Refund liabilities for income, corporation franchise, and sales taxes, totaling approximately \$718.2 million, are reported for governmental activities as "Refunds and Other Liabilities" on the Statement of Net Assets, of which, \$647.8 million is reported in the General Fund and \$70.4 million is reported in the Revenue Distribution Special Revenue Fund on the governmental funds' balance sheet.

NOTE 5 RECEIVABLES (Continued)

B. Intergovernmental Receivables — Primary Government

The intergovernmental receivable balance reported for the primary government, all of which is expected to be collected within the next fiscal year, consisted of the following, as of June 30, 2002 (dollars in thousands).

	From Nonexchange Programs		From Sales of Goods and Services		Total Primary Government
	Federal Government	Local Government	Other State Governments	Local Government	
Governmental Activities:					
Major Governmental Funds:					
General	\$ 475,359	\$ 7,429	\$ —	\$ 7,928	\$ 490,716
Job, Family and Other Human Services	321,388	128,774	—	—	450,162

Transfers are used to 1.) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them, 2.) move receipts restricted to debt service from the funds collecting the receipts to the debt

service fund as debt service payments become due, and 3.) utilize unrestricted revenues collected in one fund to finance various programs accounted for in other funds in accordance with budget authorizations.

**NOTE 7 INTERFUND BALANCES AND TRANSFERS
AND SIGNIFICANT TRANSACTIONS WITH COMPONENT UNITS (Continued)**

C. Component Units

For fiscal year 2002, the component units reported \$2.49 billion in state assistance revenue from the primary government in the Statement of Activities.

Included in "Primary, Secondary and Other Education" expenses reported for governmental activities, is funding that the primary government provided to the School Facilities Commission for capital construction at local school districts and the SchoolNet Commission for the acquisition of computers to benefit local schools.

Additionally, the primary government provided financial support to the colleges and universities in the

form of state appropriations for instructional and non-instructional purposes and capital appropriations for construction. This assistance is included in "Higher Education Support" expenses reported for governmental activities.

Finally, "Community and Economic Development" expenses reported for governmental activities includes amounts that the primary government provided to the Arts and Sports Facilities Commission for its capital construction projects.

Details of balances and activity reported in the government-wide financial statements between the primary government and its discretely presented component units are summarized below.

**Intra-entity Balances and Activity

Fiscal Year 2002 Increases to Accumulated Depreciation	<u>\$399,642</u>

NOTE 9 PENSION PLANS AND OTHER POSTEMPLOYMENT BENEFITS

All part-time and full-time employees and elected officials of the State, including its component units, are eligible to be covered by one of the following retirement plans:

- Ohio Public Employees Retirement System
- State Teachers Retirement System of Ohio
- State Highway Patrol Retirement System
- Alternative Retirement Plan

A. Ohio Public Employees Retirement System (OPERS)

Pension Benefits

OPERS is a cost-sharing, defined benefit multiple-employer public employee retirement system.

OPERS benefits are established under Chapter 145, Ohio Revised Code. OPERS provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries.

Regular employees may retire after 30 years of credited service regardless of age, at age 55 or after with 25 years of credited service, or at age 60 or after with five years of credited service. Regular employees retiring before age 65 with less than 30 years of service credit receive a percentage reduction in benefit amounts. Law enforcement employees may retire at age 48 with 25 or more years of credited service.

The retirement allowance is based on years of credited service and the final average salary, which is the average of the member's three highest salary years. The annual allowance for regular employees is determined by multiplying the final average salary by 2.2 percent for each year of Ohio contributing service up to 30 years and by 2.5 percent for all other years in excess of 30 years of credited service. The annual allowance for law enforcement employees is determined by multiplying the final average salary by 2.5 percent for the first 25 years of Ohio contributing service, and by 2.1 percent for each year of service over 25 years. Retirement benefits increase three percent annually regardless of changes in the Consumer Price Index.

Employer and employee required contributions to OPERS are established under the Ohio Revised Code and are based on percentages of covered employees' gross salaries, which are calculated annually by the retirement system's actuaries. Contribution rates for calendar year 2001 were as follows:

	Contribution Rates	
	Employee Share	Employer Share
Regular Employees	8.50%	13.31%
Law Enforcement Employees..	10.10%	16.70%
Public Safety Employees.....	9.00%	16.70%

Employer contributions required and made for the last three years follow (dollars in thousands).

Primary Government		
For the Year Ended December 31,	Employer's Contribution for Regular Employees	Employer's Contribution for Law Enforcement Employees
2001	\$236,188	\$3,649
2000	159,528	2,994
1999	221,791	3,094

Component Units	
For the Year Ended June 30,	Employer's Contribution for Regular Employees
2002	\$109,668
2001	72,686
2000	101,154

Recent legislation also grants OPERS the authority to establish a defined contribution plan as an alternative to the current defined benefit plan. OPERS is currently developing such a plan, which is expected to become operational sometime in early calendar year 2003. Law enforcement employees will not be eligible to participate in the alternative plan, which will cover classes of employees not currently eligible to participate in the existing OPERS alternative retirement plan, as discussed further in Note 9D.

OPERS issues a stand-alone financial report, copies of which may be obtained by making a written request to: Ohio Public Employees Retirement System, 277 East Town Street, Columbus, Ohio 43215-4642, or by calling (614) 466-2085 or 1-800-222-OPERS.

Other Postemployment Benefits

All age and service retirees with 10 or more years of service credit qualify for healthcare coverage under OPERS. Healthcare coverage for disability recipients and primary survivor recipients is also available. Chapter 145, Ohio Revised Code, provides the statutory authority for employer contributions. For calendar year 2001, the portion of the employer rate that is used to fund healthcare is 4.3 percent of covered payroll for law enforcement and regular em-

NOTE 9 PENSION PLANS AND OTHER POSTEMPLOYMENT BENEFITS (Continued)

employees. Employees do not fund any portion of healthcare costs.

Benefits are advance-funded using the entry-age, normal cost method. Significant actuarial assumptions, based on the latest actuarial review performed as of December 31, 2000 (the latest information available), include a rate of return on investments of 7.75 percent, an annual increase in total payroll for active employees of 4.75 percent compounded annually (assuming no change in the number of active employees), and an additional increase in total payroll of between .54 percent and 5.1 percent based on additional annual pay increases. Healthcare premiums were assumed to increase 4.75 percent annually.

Net assets available for payment of benefits at December 31, 2000 were \$11.7 billion. The actuarially accrued liability and the unfunded actuarial accrued liability were \$14.3 billion and \$2.6 billion, respectively. All investments are carried at market value.

For the actuarial valuation of net assets available for future healthcare benefits, OPERS applies the smoothed market approach. Under this approach, assets are adjusted annually to reflect 25 percent of unrealized market appreciation or depreciation on investments.

The State's actuarially required and actual contributions for the OPERS healthcare plan are as follows (dollars in thousands):

Primary Government:

(for the year ended December 31, 2001)	
Regular Employees	\$112,720
Law Enforcement and Public Safety Employees.....	1,265
Total.....	\$113,985

Component Units:

(for the year ended June 30, 2002).....	\$ 51,964
---	-----------

The number of active contributing participants for the primary government was 60,238, as of December 31, 2001.

B. State Teachers Retirement System of Ohio (STRS)

Pension Benefits

STRS is a cost-sharing, defined benefit multiple-employer public employee retirement system.

Participants in STRS, may retire after 30 years of credited service regardless of age, or at or after age 55 with 25 years of credited service, or at or after

age 60 with five years of credited service. Members retiring before age 65 with less than 30 years of service credit receive a percentage reduction in benefit amounts. Retirees are entitled to a maximum annual retirement benefit, payable in monthly installments for life, equal to the greater of the "formula benefit" or the "money-purchase benefit" calculation.

Under the "formula benefit" calculation, the retirement allowance is based on years of credited service and the final average salary, which is the average of the member's three highest salary years. The annual allowance is determined by multiplying the final average salary by 2.5 percent for each year of Ohio contributing service in excess of 30 years and by 2.2 percent for all other years of credited service up to a maximum annual allowance of 100 percent of final average salary. Each year over 30 years is increased incrementally by .1 percent starting at 2.5 percent for the 31st year of Ohio service. For teachers with 35 or more years of earned service, the annual allowance is determined by multiplying the final average salary by 2.5 percent for the first 30 years of service.

Under the "money-purchase benefit" calculation, a member's lifetime contributions, plus interest at specified rates, are matched by an equal amount from contributed employer funds. This total is then divided by an actuarially determined annuity factor to determine the maximum annual retirement allowance. Retirement benefits increase three percent annually regardless of changes in the Consumer Price Index.

A retiree of STRS or any other Ohio public retirement system is eligible for re-employment as a teacher after two months from the date of retirement. Members and the employer make contributions during the period of re-employment. Upon termination or the retiree reaches the age of 65, whichever comes later, the retiree is eligible for a money-purchase benefit or a lump-sum payment in addition to the original retirement allowance.

STRS also provides death, survivors', disability, healthcare, and supplemental benefits. STRS benefits are established under Chapter 3307, Ohio Revised Code.

Employer and employee required contributions to STRS are established by the Board and limited under the Ohio Revised Code to employer and employee rates of 14 percent and 10 percent, respectively, and are based on percentages of covered employees' gross salaries, which are calculated annually by the retirement system's actuary.

NOTE 9 PENSION PLANS AND OTHER POSTEMPLOYMENT BENEFITS (Continued)

Contribution rates for fiscal year 2002 were 14 percent for employers and 9.3 percent for employees. For STRS, 9.5 percent of the employer rate is used to fund pension obligations. The difference between the total employer rate and the share used to fund pension obligations is the percentage used to fund the STRS healthcare program.

Employer contributions required and made for the last three years are as follows (dollars in thousands):

Year Ended June 30,	Primary Government	Component Units
2002	\$5,420	\$88,184
2001	5,177	93,410
2000	3,028	59,841

STRS issues a stand-alone financial report, copies of which may be obtained by making a written request to: State Teachers Retirement System of Ohio, 275 East Broad Street, Columbus, Ohio 43215-3771, or by calling 1-888-227-7877.

Other Postemployment Benefits

The STRS plan provides comprehensive healthcare benefits to retirees and their dependents. Retirees are required to make healthcare premium payments at amounts that vary according to each retiree's years of credited service and choice of healthcare provider. Retirees must pay additional premiums for covered spouses and dependents. Chapter 3307, Ohio Revised Code, gives the STRS board discretionary authority over how much, if any, of associated healthcare costs are absorbed by the plan. Currently, employer contributions equal to 4.5 percent of covered payroll are allocated to pay for healthcare benefits.

The employer contribution is financed on a pay-as-you-go basis. As of June 30, 2001 (the most recent information available), net assets available for future healthcare benefits were \$3.3 billion. Net healthcare costs paid by the primary government and its component units, for the year ended June 30, 2002, totaled approximately \$2.6 million and \$41.8 million, respectively. The number of eligible benefit recipients for STRS as a whole was 116,512, as of June 30, 2001; a breakout of the number of eligible recipients for the primary government and its component units, as of June 30, 2002, is unavailable.

C. State Highway Patrol Retirement System (SHPRS)

SHPRS, a component unit of the State, was established in 1944 by the General Assembly as a single-employer, defined benefit pension plan and is administered by the State.

The plan issues a stand-alone financial report that includes financial statements and required supplementary information, and the State reports the plan as a pension trust fund. Copies of the financial report may be obtained by writing to the Ohio State Highway Patrol Retirement System, 6161 Busch Boulevard, Suite 119, Columbus, Ohio 43229-2553, or by calling (614) 431-0781 or 1-800-860-2268.

SHPRS is authorized under Chapter 5505, Ohio Revised Code, to provide retirement and disability benefits to retired members and survivor benefits to qualified dependents of deceased members of the Ohio State Highway Patrol. Chapter 5505, Ohio Revised Code, also requires contributions by active members and the Ohio State Highway Patrol. The employee contribution rate is established by the General Assembly, and any change in the rate requires legislative action. The SHPRS Retirement Board establishes and certifies the employer contribution rate to the State of Ohio every two years. By law, the employer rate may not exceed three times the employee contribution rate nor be less than the employee's contribution rate.

Contribution rates for calendar year 2001 are as follows:

Contribution Rates	
Employee Share	Employer Share
9.50%	23.50%

During calendar year 2001, all of the employees' contributions funded pension benefits while 18.75 percent of the employer's contributions funded pension benefits. The difference in the total employer rates charged and the employer rates applicable to the funding of pension benefits is applied to the funding of postemployment healthcare benefits.

SHPRS's financial statements are prepared using the accrual basis of accounting, under which expenses are recorded when the liability is incurred and revenues are recorded when they are earned and become measurable.

All investments are reported at fair value. Fair value is, "the amount that the plan can reasonably expect to receive for an investment in a current sale, between a willing buyer and a willing seller – that is, other than in a forced or liquidation sale." Short-term investments are reported at cost, which approximates fair value. Corporate bonds are valued at the median price by the brokerage firms.

NOTE 9 PENSION PLANS AND OTHER POSTEMPLOYMENT BENEFITS (Continued)

Securities traded on a national exchange are valued at the last reported sales price at the current exchange rate. The fair value of real estate investments is based on the estimated current value and on independent appraisals. For actuarial purposes, assets are valued with a method that amortizes each year's investment gain or loss over a closed, four-year period.

The employer's annual pension costs for the last three calendar years are as follows (dollars in thousands):

Year Ended December 31,	Primary Government	Percentage of Employer's Annual Pension Cost Contributed
2001	\$13,765	100%
2000	11,686	100%
1999	13,351	100%

SHPRS used the entry-age, normal actuarial cost method for the Schedule of Funding Progress for the actuarial valuation, dated December 31, 2001. Assumptions used in preparing the Schedule of Funding Progress and in determining the annual required contribution include: an eight percent rate of return on investments; projected salary increase of 4.5 percent attributable to inflation and additional projected salary increases ranging from .3 percent to 3.7 percent a year attributable to seniority and merit; price inflation was assumed to be at least three percent a year; and postretirement increases each year equal to the increase in the Consumer Price Index (not to exceed three percent).

The unfunded actuarial accrued liability is being amortized using the level-percentage of projected payroll method over a closed period of eight years.

The Schedule of Funding Progress for the last three years is presented in the table below. Amounts re-

ported do not include assets or liabilities for postemployment healthcare benefits.

Other Postemployment Benefits

In addition to providing pension benefits, SHPRS pays health insurance claims on behalf of all persons receiving a monthly pension or survivor benefit and Medicare Part B basic premiums for those eligible benefit recipients upon proof of coverage. The number of active contributing plan participants, as of December 31, 2001, was 1,520. The cost of retiree healthcare benefits is recognized as claims are incurred and premiums are paid. The calendar year 2001 expense was \$6.2 million.

Healthcare benefits are established in Chapter 5505, Ohio Revised Code, and are advance funded by the employer on the same actuarially determined basis (using the same assumptions) as are the SHPRS pension benefits, as previously discussed. In addition, the assumption that projected healthcare premiums would increase at a rate of 4.5 percent, compounded annually, due to inflation was also used in the valuation. Net assets available for benefits allocated to healthcare costs at December 31, 2001 were \$93.8 million, and included investments carried at fair value, as previously described.

As of December 31, 2001, the actuarial accrued liability for healthcare benefits, the portion of the present value of plan promises to pay benefits in the future that are not covered by future normal cost contributions, was \$51.6 million; the actuarial accrued liability for healthcare benefits at that date was \$145.4 million.

Employer contributions are made in accordance with actuarially determined requirements. The employer contribution requirement was approximately \$3.5 million or 4.75 percent of active member payroll for the period, January 1 through December 31, 2001.

SHPRS Schedule of Funding Progress
Last Three Calendar Years
(dollars in thousands)

(A) Valuation Year	(B) Actuarial Accrued Liability (AAL)	(C) Valuation Assets	(D) Unfunded Actuarial Accrued Liability (UAAL) (B) - (C)	(E) Ratio of Assets to AAL (C)/(B)	(F) Active Member Payroll	(G) UAAL as Percentage of Active Member Payroll (D)/(F)
2001	\$636,715	\$551,279	\$85,436	86.6%	\$76,344	111.9%
2000 (a)	594,223	570,040	24,183	95.9	69,028	35.0
2000	607,411	570,040	37,371	93.8	69,028	54.1
1999 (b)	577,010	546,511	30,499	94.7	66,017	46.2
1999	564,673	546,511	18,162	96.8	66,017	27.5

(a) Change in assumption or method.
(b) The plan was amended in 1999.

NOTE 9 PENSION PLANS AND OTHER POSTEMPLOYMENT BENEFITS (Continued)

D. Alternative Retirement Plan (ARP)

Pension Benefits

The ARP is a defined contribution retirement plan that is authorized under Section 3305.02, Ohio Revised Code. The ARP provides at least three or more alternative retirement plans for academic and administrative employees of Ohio's institutions of higher education, who otherwise would be covered by STRS or OPERS. Classified civil service employees are not eligible to participate in the ARP.

The Board of Trustees of each public institution of higher education enters into contracts with each approved retirement plan provider. Once established, full-time faculty and unclassified employees who are hired subsequent to the establishment of the ARP, or who had less than five years of service credit under the existing retirement plans, may choose to enroll in the ARP. The choice is irrevocable for as long as the employee remains continuously employed in a position for which the ARP is available. For those employees that choose to join the ARP, any prior employee contributions that had been made to STRS or OPERS would be transferred to the ARP. The Ohio Department of Insurance has designated eight companies as being eligible to serve as plan providers for the ARP.

Ohio law requires that employee contributions be made to the ARP in an amount equal to those that would otherwise have been required by the retirement system that applies to the employee's position. Therefore, employees who would have otherwise been enrolled in STRS or OPERS would contribute 9.3 percent or 8.5 percent of their gross salaries, respectively. Employees may also voluntarily make additional contributions to the ARP.

Ohio law also requires each public institution of higher education contribute 3.5 percent of a participating employee's gross salary for the year ended June 30, 2002 to STRS in cases when the employee would have otherwise been enrolled in STRS.

For the year ended June 30, 2002, employers were not required to contribute to the ARP on behalf of employees that would otherwise have been enrolled in OPERS.

The employer contribution amount is subject to actuarial review every third year to determine if the rate needs to be adjusted to mitigate any negative financial impact that the loss of contributions may have on STRS and OPERS. The Board of Trustees of each public institution of higher education may also make additional payments to the ARP based on the gross salaries of employees multiplied by a percentage the respective Board of Trustees approves.

The ARP provides full and immediate vesting of all contributions made on behalf of participants. The contributions are directed to one of the eight investment management companies as chosen by the participants. The ARP does not provide disability benefits, annual cost-of-living adjustments, postretirement health care benefits, or death benefits. Benefits are entirely dependent on the sum of the contributions and related investment income generated by each participant's choice of investment options.

Employer and employee contributions required and paid for the year ended June 30, 2002 totaled \$53.2 million and \$37 million, respectively.

NOTE 10 GENERAL OBLIGATION BONDS

The State has pledged its full faith and credit for the payment of principal and interest on general obligation bonds.

At various times since 1921, Ohio voters, by 17 constitutional amendments (the last adopted in November 2000 for land conservation purposes), have authorized the incurrence of general obligation debt for the construction and improvement of common school and higher education facilities, highways, local infrastructure improvements, research and development of coal technology, and natural resources. In practice, general obligation bonds are retired over periods of 10 to 25 years.

A 1999 constitutional amendment provided for the issuance of Common Schools Capital Facilities Bonds and Higher Education Capital Facilities Bonds. As of June 30, 2002, the General Assembly had authorized the issuance of \$1.25 billion in Common Schools Capital Facilities Bonds, of which \$740 million had been issued and \$711.9 million was outstanding. As of June 30, 2002, the General Assembly had also authorized the issuance of \$1.21 billion in Higher Education Capital Facilities Bonds, of which \$775 million had been issued and \$739.4 million was outstanding.

Through approval of the November 1995 amendment, voters authorized the issuance of Highway

NOTE 10 GENERAL OBLIGATION BONDS (Continued)

Capital Improvements Bonds in amounts up to \$220 million in any fiscal year (plus any prior fiscal years' principal amounts not issued under the new authorization), with no more than \$1.2 billion outstanding at any time. As of June 30, 2002, the General Assembly had authorized the issuance of approximately \$1.35 billion in Highway Capital Improvements Bonds, of which \$1 billion had been issued and \$702.5 million was outstanding.

A 1987 constitutional amendment provided for the issuance of \$1.2 billion of general obligation bonds for infrastructure improvements (Infrastructure Bonds), of which no more than \$120 million may be issued in any calendar year. As of June 30, 2002, the General Assembly had authorized \$1.2 billion of these bonds to be sold, of which approximately \$1.2 billion had been issued and \$818.4 million (net of unaccreted discount of \$90.9 million on deep-discount bonds issued) was outstanding.

In November 1995, voters approved another constitutional amendment that provided for the issuance of an additional \$1.2 billion of Infrastructure Bonds, of which no more than \$120 million (plus any prior years' principal amounts not issued under the new authorization) may be sold in any state fiscal year. As of June 30, 2002, the General Assembly had authorized \$600 million in Infrastructure Bonds to be issued under the provisions of the 1995 constitutional amendment, of which \$480 million had been issued and \$445.9 million (including \$2.9 million in unamortized premium) was outstanding.

A 1968 constitutional amendment authorized the issuance of Highway Obligations in amounts up to

\$100 million in any calendar year, with no more than \$500 million in principal amount outstanding at any one time. The aggregate of General Assembly authorizations, as of June 30, 2002, for Highway Obligations, was approximately \$1.75 billion, all of which had been issued and \$87 million was outstanding.

Coal Research and Development Bonds and Parks, Recreation, and Natural Resources Bonds may be issued as long as the outstanding principal amounts do not exceed \$100 and \$200 million, respectively. As of June 30, 2002, the General Assembly had authorized the issuance of \$150 million in Coal Research and Development Bonds, of which \$137 million had been issued and \$49.5 million was outstanding. Legislative authorizations for the issuance of Natural Resources Capital Facilities Bonds totaled \$272 million, as of June 30, 2002, of which \$210 million had been issued and \$165.2 million was outstanding.

During fiscal year 2002, the State issued \$50 million in Conservation Projects Bonds for the first time. Not more than \$50 million in Conservation Projects Bonds may be issued in a fiscal year and not more than \$200 million may be issued.

General obligation bonds outstanding and bonds authorized but unissued, as of June 30, 2002, are presented in the table below.

For the year ended June 30, 2002, NOTE 15 summarizes changes in general obligation bonds.

**Primary Government-Governmental Activities
General Obligation Bonds
As of June 30, 2002**
(dollars in thousands)

Total General Obligation Bonds				\$3,771,129	\$1,491,324

NOTE 10 GENERAL OBLIGATION BONDS (Continued)

Future general obligation debt service requirements, as of June 30, 2002, are as follows (dollars in thousands):

Year Ending June 30,	Principal	Interest	Total
2003	\$ 301,110	\$ 169,986	\$ 471,096
2004	310,775	158,341	469,116
2005	281,640	144,967	426,607
2006	270,180	132,818	402,998
2007	268,025	121,171	389,196
2008-2012	1,149,745	435,374	1,585,119
2013-2017	789,935	203,973	993,908
2018-2022	436,490	54,965	491,455
2023-2027	26,340	668	27,008
	3,834,240	1,422,263	5,256,503
Net Unamor- tized Premium/ (Discount)	(63,111)	—	(63,111)
Total	<u>\$3,771,129</u>	<u>\$1,422,263</u>	<u>\$5,193,392</u>

As of June 30, 2002, the outstanding balance reported for Infrastructure Improvement Bonds included approximately \$63.9 million in variable rate bonds that were issued during fiscal year 2002. The adjustable interest rate on the bonds is reset weekly at a rate determined by the remarketing agent, not to exceed 12 percent. The rate for these bonds was 1.15 percent, as of June 30, 2002.

In prior years, the Treasurer of State defeased certain Infrastructure Improvement Bonds by placing the proceeds of new bonds in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the various trust accounts' assets and liabilities for the defeased bonds are not included in the State's financial statements. As of June 30, 2002, \$45.1 million of Infrastructure Improvement Bonds are considered defeased and no longer outstanding.

NOTE 11 REVENUE BONDS AND NOTES

The State Constitution permits state agencies and authorities to issue bonds that are not supported by the full faith and credit of the State. These bonds pledge income derived from user fees and rentals on the acquired or constructed assets to pay the debt service. Issuers for the primary government include the Ohio Building Authority (OBA), which has issued revenue bonds on its own behalf and for the Ohio Bureau of Workers' Compensation, the Treasurer of State for the Ohio Department of Development's Office of Business Development, and the Ohio Department of Transportation. Major issuers for the State's component units include the Ohio Water Development Authority, the Ohio State University, the University of Cincinnati, and Kent State University.

A. Primary Government

Economic development bonds, issued by the Treasurer of State for the Office of Business Development's Direct Loan Program, provide financing for loans and loan guarantees to businesses within the State for economic development projects that create or retain jobs in the State. The taxable bonds are backed with profits derived from the sale of spirituous liquor by the Division of Liquor Control and pledged moneys and related investment earnings held in reserve under a trust agreement with a financial institution.

Since fiscal year 1998, the Treasurer of State has issued a total of \$190 million in State Infrastructure Bank Bonds for various highway construction projects sponsored by the Department of Transportation. The State has pledged federal highway receipts as the primary source of moneys for meeting the principal and interest requirements on the bonds.

Revenue bonds accounted for in business-type activities finance the costs of the William Green Building, which houses the main operations of the Ohio Bureau of Workers' Compensation in Columbus and other office buildings and related facilities constructed by the OBA for shared use by local governments. The principal and interest requirements on the OBA bonds are paid from rentals received under the long-term lease agreements discussed in NOTE 5D.

Revenue bonds outstanding for the primary government, as of June 30, 2002, are presented in the table at the top of the following page.

For the year ended June 30, 2002, NOTE 15 summarizes changes in revenue bonds.

NOTE 11 REVENUE BONDS AND NOTES (Continued)

**Primary Government
Revenue Bonds
As of June 30, 2002**
(dollars in thousands)

	Fiscal Year Issued	Interest Rates	Maturing Through Fiscal Year	Outstanding Balance
Governmental Activities:				
Treasurer of State:				
Economic Development	1997	6.7%-7.7%	2022	\$144,760
State Infrastructure Bank	1998-02	4.5%-5.0%	2009	152,878

Total Business-Type Activities.....				190,723
Total Revenue Bonds.....				\$488,361

Future bond service requirements for revenue bonds of the primary government, as of June 30, 2002, are presented in the table below.

In December 1998, the Treasurer of State entered into a forward purchase refunding agreement to advance refund approximately \$102 million in Series 1996 Taxable Development Assistance Bonds on October 1, 2006. Under the terms of the bond purchase agreement, the underwriter has agreed to purchase approximately \$102 million in Series 1998 Taxable Development Assistance Refunding Bonds and deliver to the escrow agent on or before August 25, 2006 cash and/or direct U.S. government obligations sufficient to provide for the redemption of the refunded bonds on October 1, 2006. Because the State has not taken delivery of the proceeds from the issuance of the Series 1998 Taxable Development Assistance Refunding Bonds, as of June 30,

2002, no obligation for the refunding bonds has been included in the financial statements.

B. Component Units

Ohio Water Development Authority (OWDA) bonds and notes provide financing to local government authorities (LGA) in the State of Ohio for the acquisition, construction, maintenance, repair, and operation of water development projects and solid waste projects, including the construction of sewage and related water treatment facilities. The principal and interest requirements on OWDA obligations are generally paid from investment earnings, federal funds and/or repayments of loan principal and interest thereon from the LGAs.

A portion of OWDA's outstanding bonds has been issued for the Water Pollution Control Loan Program, which provides low-cost financing to LGAs for

NOTE 11 REVENUE BONDS AND NOTES (Continued)

the construction of wastewater treatment facilities. In the event pledged program revenues, which consist of interest payments from the LGAs as reimbursement for construction costs, are not sufficient to meet debt service requirements for the bonds, the General Assembly may appropriate moneys for the full replenishment of a bond reserve. As of December 31, 2001, approximately \$649.9 million in bonds were outstanding for this program.

Future bond service requirements for the Water Pollution Control Loan Program revenue bonds, as of December 31, 2001, are as follows (dollars in thousands):

Year Ending December 31,	Principal	Interest	Total
2002	\$113,840	\$ 30,182	\$144,022

Total	<u>\$649,873</u>	<u>\$245,847</u>	<u>\$895,720</u>

Generally, bonds and notes issued by the state universities and state community colleges are payable from the institutions' available receipts, including student fees, rental income, and gifts and donations, as may be provided for in the respective bond proceedings, for the construction of residence educational facilities and auxiliary facilities such as dining halls, hospitals, parking facilities, bookstores, and athletic facilities.

Except as previously discussed with respect to OWDA's Water Pollution Control Loan Program bonds, the State is not obligated in any manner for the debt of its component units.

Future bond service requirements for revenue bonds and notes reported for the discretely presented component units, as of June 30, 2002, are presented in the table below, which also continues on the following page.

Of the outstanding revenue bonds and notes reported for the OWDA component unit fund, \$5.9 million in bonds had an adjustable interest rate that is reset weekly at a rate determined by the remarketing agency, not to exceed 10 percent. The rate for these notes was 1.71 percent, as of December 31, 2001.

NOTE 12 SPECIAL OBLIGATION BONDS

The Ohio Building Authority (OBA) and the Treasurer of State issue special obligation bonds reported in governmental activities.

OBA bonds finance the capital costs of categories of facilities including correctional facilities and office buildings for state departments and agencies and, in some cases, related facilities for local governments.

Under the authority of Chapter 154, Ohio Revised Code, the Treasurer of State is the issuer of special obligation bonds that finance the cost of capital facilities for state-supported institutions of higher education, mental health and retardation institutions, and parks and recreation. Prior to September 14, 2000, when House Bill 640 became effective and reassigned the issuing authority for these obligations to the Treasurer of State, the Ohio Public Facilities Commission issued the Chapter 154 bonds.

Elementary and Secondary Education Bonds, which the Treasurer of State issued for the Department of

Education, finance the construction costs of capital facilities for local school districts.

The State reports OBA bonds issued for capital projects that benefit state agencies as special obligation bonds, while OBA bonds issued to finance the costs of local government facilities are reported as revenue bonds (See NOTE 11).

Pledges of lease rental payments from appropriations made to the General Fund, Highway Safety and Highway Operating Special Revenue funds, and Underground Parking Garage Enterprise Fund, moneys held by trustees pursuant to related trust agreements, and other receipts, as required by the respective bond documents, secure the special obligation bonds. The lease rental payments are reported in the fund financial statements as interfund transfers.

Special obligation bonds outstanding and bonds authorized but unissued, as of June 30, 2002, are presented in the table on the top of the following page.

NOTE 12 SPECIAL OBLIGATION BONDS (Continued)

Total Special Obligation Bonds.....				<u>\$4,389,102</u>	<u>\$745,925</u>

For the year ended June 30, 2002, NOTE 15 summarizes changes in special obligation bonds.

Future special obligation debt service requirements, as of June 30, 2002, are as follows (dollars in thousands):

Year Ending June 30,	Principal	Interest	Total
2003	\$ 465,789	\$ 212,472	\$ 678,261
2004	463,560	190,470	654,030
2005	441,348	176,011	617,359
2006	430,984	153,396	584,380
2007	428,364	124,009	552,373
2008-2012	1,494,574	358,768	1,853,342
2013-2017	543,300	97,515	640,815
2018-2022	130,445	11,284	141,729
	4,398,364	1,323,925	5,722,289
Net Unamor- tized Premium/ (Discount).....	(9,262)	—	(9,262)
Total	<u>\$4,389,102</u>	<u>\$1,323,925</u>	<u>\$5,713,027</u>

During fiscal year 2002, the OBA had three separate advance refundings as follows:

The OBA issued approximately \$250 million in refunding bonds with an average interest rate of 4.38 percent to defease approximately \$250 million in principal and interest on the special obligation bonds being refunded (\$213 million *in substance*). At the date of the refunding, the refunded bonds had an average interest rate of 5.98 percent. The refunding resulted in an economic gain of \$10 million.

The OBA issued approximately \$13 million in refunding bonds with an average interest rate of 3.84 percent to defease approximately \$13 million in principal and interest on the special obligation bonds being refunded (\$6.6 million *de-feased in substance*). At the date of the refunding, the refunded bonds had an average interest rate of 6.34 percent. The refunding resulted in an economic gain of \$405 thousand.

The OBA issued approximately \$59 million in refunding bonds with an average interest rate of 3.88 percent to defease *in substance* approximately \$56 million in principal and interest on the special obligation bonds being refunded. At the date of the refunding, the refunded bonds had an average interest rate of 5.79 percent. The refunding resulted in an economic gain of \$2.5 million.

In prior years, the OBA and the Treasurer of State defeased certain bond issues by placing the proceeds of new bonds in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the various trust accounts' assets and liabilities for the defeased bonds are not included in the State's financial statements. As of June 30, 2002, \$417.4 million and \$380.5 million of OBA and Chapter 154 special obligation bonds, respectively, are considered defeased and no longer outstanding.

NOTE 13 CERTIFICATES OF PARTICIPATION

As of June 30, 2002, approximately \$9.9 million in certificate of participation (COP) obligations were reported in governmental activities.

In fiscal year 1992, the Ohio Department of Transportation participated in the issuance of \$8.7 million of COP obligations to finance the acquisition of the Panhandle Rail Line Project. During fiscal year 1996, the Department also participated in the issuance of \$10 million in COP obligations to finance state assistance to the Greater Cleveland Regional Transit Authority for a share of the Cleveland Waterfront Transit Line Project's construction cost, and \$10.2 million in obligations to provide assistance to the Rickenbacker Port Authority for facility improvements at the Rickenbacker International Airport in Franklin and Pickaway counties.

Under the COP financing arrangements, the State is required to make rental payments from the Transportation Certificates of Participation Debt Service Fund and the General Fund (subject to biennial appropriations) that approximate the interest and principal payments made by trustees to certificate holders.

Obligations outstanding for the primary government under COP financing arrangements, as of June 30,

2002, are presented in the first table below.

As of June 30, 2002, the primary government's future commitments under the COP financing arrangements are as follows (dollars in thousands):

Year Ending June 30,	Principal	Interest	Total
2003	\$ 2,530	\$ 558	\$ 3,088
2004	890	465	1,355
2005	945	408	1,353
2006	1,005	348	1,353
2007	800	285	1,085
2008-2012 ..	3,730	851	4,581
Total	<u>\$9,900</u>	<u>\$2,915</u>	<u>\$12,815</u>

For the year ended June 30, 2002, NOTE 15 summarizes changes in COP obligations.

For the State's component units, approximately \$10 million in COP obligations are reported in the component unit funds. The obligations finance building construction costs at the Ohio State University and University of Cincinnati.

As of June 30, 2002, future commitments under the COP financing arrangements for the State's component units are detailed in the second table below.

**Primary Government — Governmental Activities

NOTE 14 OTHER NONCURRENT LIABILITIES

As of June 30, 2002, in addition to bonds and certificate of participation obligations discussed in NOTES 10 through 13, the State reports the following non-current liabilities in its financial statements (dollars in thousands):

Governmental Activities:	
Compensated Absences	\$ 381,929
Capital Leases Payable	3,933
Litigation Liabilities.....	30,000
Liability for Escheat Property	103,590
Total Governmental Activities.....	<u>519,452</u>
Business-Type Activities:	
Compensated Absences	12,648
Capital Leases Payable	57,171
Workers' Compensation:	
Deferred Revenue.....	413,086
Benefits Payable	13,267,172
Other (includes compensated absences totaling \$20,903)	1,797,022
Deferred Prize Awards Payable.....	997,944
Tuition Benefits Payable	738,200
Total Business-Type Activities.....	<u>17,283,243</u>
Total Primary Government.....	<u>\$17,802,695</u>
Component Units:	
Compensated Absences	\$ 206,265
Capital Leases Payable	202,082
Intergovernmental Payable.....	1,343,734
Deferred Revenue.....	132,637
Other.....	232,913
Total Component Units	<u>\$ 2,117,631</u>

For the year ended June 30, 2002, NOTE 15 summarizes the changes in other noncurrent liabilities. Explanations of certain significant noncurrent liability balances reported in the financial statements follow.

A. Compensated Absences

For the primary government, the compensated absences liability, as of June 30, 2002, was \$415.5 million, of which \$381.9 million is allocable to governmental activities and \$33.6 million is allocable to business-type activities.

As of June 30, 2002, \$206.3 million of the "Other Noncurrent Liabilities" balance reported for component units represents compensated absences.

B. Lease Agreements

The State's primary government leases office buildings and office and computer equipment. Although the lease terms vary, most leases are renewable subject to biennial appropriations by the General Assembly. If the likelihood of the exercise of a fiscal funding clause in the lease agreement is, in the management's judgment, remote, then the lease is

considered noncancelable for financial reporting purposes and is reported as a fund expenditure/expense for operating leases or as a liability for capital leases.

Assets acquired through capital leasing are valued at the lower of fair value or the present value of the future minimum lease payments at the lease's inception.

Operating leases (leases on assets not recorded in the Statement of Net Assets) contain various renewal options as well as some purchase options.

Any escalation clauses, sublease rentals, and contingent rents are considered immaterial to the future minimum lease payments and current rental expenditures. Operating lease payments are recorded as expenditures or expenses of the related funds when paid or incurred.

The primary government's total operating lease expenditures/expenses for fiscal year 2002 were approximately \$94.4 million.

Future minimum lease commitments for operating leases and capital leases judged to be noncancelable, as of June 30, 2002, are as follows (dollars in thousands):

<u>Primary Government</u>	
<u>Year Ending June 30,</u>	<u>Operating Leases</u>
2003.....	\$5,952
2004.....	13
Total minimum lease payments.....	<u>\$5,965</u>

<u>Year Ending June 30,</u>	<u>Capital Leases</u>		
	<u>Govern- mental Activities</u>	<u>Business- Type Activities</u>	<u>Total</u>
2003.....	\$1,982	\$16,123	\$18,105
2004.....	1,270	16,108	17,378
2005.....	725	16,107	16,832
2006.....	347	16,107	16,454
2007.....	156	—	156
Total Mini- mum Lease Payments	4,480	64,445	68,925
Amount for interest	(547)	(7,274)	(7,821)
Present Value of Net Mini- mum Lease Payments	<u>\$3,933</u>	<u>\$57,171</u>	<u>\$61,104</u>

NOTE 14 OTHER NONCURRENT LIABILITIES (Continued)

As of June 30, 2002, the primary government had the following capital assets (net of accumulated depreciation for proprietary funds) under capital leases (dollars in thousands):

	Primary Government		Total
	Governmental Activities	Business-Type Activities	
Equipment....	\$8,481	\$55,596	\$64,077
Vehicles.....	113	—	113
Total	<u>\$8,594</u>	<u>\$55,596</u>	<u>\$64,190</u>

Amortization expense for the proprietary funds within the Statement of Activities is included with depreciation expense.

Capital leases are reported under the "Refund and Other Liabilities" account in the proprietary funds. For the component units, capital lease obligations are included under the "Other Liabilities" account. Future minimum lease commitments for capital leases judged to be noncancelable and capital assets under capital leases for the component unit funds, as of June 30, 2002, are presented in the table below.

C. Litigation Liabilities

In instances when the unfavorable outcome of pending litigation has been assessed to be probable, liabilities are recorded in the financial statements. As of June 30, 2002, \$30 million in liabilities ultimately payable from various governmental funds has been recorded for this purpose.

For information on the State's loss contingencies arising from pending litigation, see NOTE 19.

D. Liability for Escheat Property

The State records a liability for escheat property to the extent that it is probable that the escheat property will be reclaimed and paid to claimants. As of June 30, 2002, this liability totaled approximately \$103.6 million.

E. Workers' Compensation

Deferred Revenue

Deferred revenue in the amount of \$413.1 million is reported as a noncurrent liability in the Workers' Compensation Enterprise Fund. This balance represents employer assessments for disabled workers benefits and for self-insuring employers guaranty deposits received or in the course of collection, but not yet recognized.

Benefits Payable

As discussed in NOTE 20A., the Workers' Compensation Enterprise Fund provides benefits to employees for losses sustained from job-related injury, disease, or death. The Bureau has computed a reserve for compensation, as of June 30, 2002, in the amount of approximately \$13.3 billion. The reserve, which includes estimates for reported claims and claims incurred but not reported, is included in the "Benefits Payable" balance reported for the enterprise fund.

Total.....	<u>\$28,543</u>	<u>\$135,361</u>	<u>\$68,660</u>	<u>\$232,564</u>

NOTE 14 OTHER NONCURRENT LIABILITIES (Continued)

Other Workers' Compensation Liabilities

Also, the Workers' Compensation Enterprise Fund reports approximately \$1.8 billion in other noncurrent liabilities, as of June 30, 2002, of which 1.) \$1.62 billion is comprised of the compensation adjustment expenses liability for estimated future expenses to be incurred in the settlement of claims, as discussed further in NOTE 20A., 2.) \$81.2 million represents premium payment security deposits collected in advance from private employers to reduce credit risk for premiums collected in subsequent periods, and 3.) \$95.4 million consists of other miscellaneous liabilities, including \$20.9 million in compensated absences.

F. Deferred Prize Awards Payable

Deferred prize awards payable in installments over future years totaling approximately \$997.9 million, as of June 30, 2002, are reported as "Liabilities Payable from Restricted Assets" at present value based upon interest rates the Treasurer of State provides the Lottery Commission Enterprise Fund. The interest rates, ranging from 4.0 to 11.7 percent, represent the expected long-term rate of return on the assets restricted for the payment of deferred prize awards. Once established for a particular deferred prize award, the interest rate does not fluctuate with changes in the expected long-term rate of return. The difference between the present value and gross amount of the obligations is amortized into income over the terms of the obligations using the interest method.

The present value of future payments of unpaid prize awards, as of June 30, 2002, is as follows (dollars in thousands):

<u>Year Ending June 30,</u>	
2003.....	\$ 145,307
2004.....	142,228
2005.....	136,113
2006.....	126,735
2007.....	115,626
2008-2012.....	382,229
2013-2017.....	315,351
2018-2022.....	219,580
	1,583,169
Unamortized Discount.....	<u>(585,225)</u>
Net Prize Liability	<u>\$ 997,944</u>

The State reduces prize liabilities by an estimate of the amount of prizes that will ultimately be unclaimed.

G. Tuition Benefits Payable

The actuarial present value of future tuition benefits payable from the Tuition Trust Authority Enterprise

Fund totaling \$738.2 million, as of June 30, 2002, are recorded as "Liabilities Payable from Restricted Assets." The valuation method reflects the present value of estimated tuition benefits that will be paid in future years and is adjusted for the effects of projected tuition increases at state universities and state community colleges and termination of plan participation.

The following assumptions were used in the actuarial determination of tuition benefits payable: 7.5 percent rate of return, compounded annually, on the investment of current and future assets; a projected annual tuition increase of 11 percent for 2003, 10 percent for 2004, nine percent for 2005 and 6.5 percent annually thereafter; and a 2.5 percent Consumer Price Index inflation rate. The projected tuition growth rates represent a change in the assumption for annual tuition growth from the constant annual 8.2 percent growth rate assumption previously applied. The 6.5 percent assumption for 2006 and later years approximates the average real increase in tuition annually from 1975 through 2005 (adjusted for inflation) assuming the indicated increases in tuition from 2003 through 2005 combined with the actuary's 2.5 percent assumption for future inflation. This change in actuarial assumption is summarized below (dollars in millions):

Actuarial Surplus, as of June 30, 2001	\$68.6
Adjustment to Prior Fiscal Year's Surplus	3.0
Interest on the Surplus at 7.5 Percent	5.4
Recognition of Shortfall	
in Investment Returns	(23.3)

Revenue	(23.8)
APV of Payments from Variable Program	<u>23.8</u>
Actuarial Surplus, as of June 30, 2002	<u>\$ 0.0</u>

As of June 30, 2002, the actuarial value of net assets available for payment of the tuition benefits payable was \$714.4 million. In determining the actuarial value of net assets available, the Authority has applied the smoothed methodology. This methodology recognizes annually one-third of the difference between assets at fair value and the expected assets based on the actuarial investment return

NOTE 14 OTHER NONCURRENT LIABILITIES (Continued)

assumption. Consequently, the assets used to determine the program's surplus are not the same as the market or cost value of the program's assets reported in the Authority's financial statements.

H. Intergovernmental Payable

As of June 30, 2002, the School Facilities Commission Component Unit Fund reports an intergovern-

mental payable balance totaling approximately \$1.34 billion for long-term funding contracts the Commission has with local school districts. The contracts commit the State to cover the costs of construction of facilities of the school districts once the districts have met certain eligibility requirements.

NOTE 15 CHANGES IN NONCURRENT LIABILITIES

Primary Government

Changes in noncurrent liabilities, for the year ended June 30, 2002, are presented for the primary government in the following table.

**Primary Government
Changes in Noncurrent Liabilities
For the Fiscal Year Ended June 30, 2002**
(dollars in thousands)

	Balance July 1, 2001	Additions	Reductions	Balance June 30, 2002	Amount Due Within One Year
Governmental Activities:					
Bonds and Notes Payable:

NOTE 15 CHANGES IN NONCURRENT LIABILITIES (Continued)

As reported in the separately issued financial report for the Workers' Compensation Enterprise Fund, the noncurrent portion of the "Other Liabilities-Miscellaneous" account presented in the table on the previous page for workers' compensation includes compensated absences in the amount (dollars in thousands) of \$20,903 and \$19,932, as of June 30, 2002 and 2001, respectively.

The State makes payments on bonds and notes payable and certificate of participation obligations that pertain to its governmental activities from the debt service funds. The General Fund will primarily liquidate the other noncurrent liabilities balance attributable to governmental activities.

For fiscal year 2002, the State included interest expense on its debt issues that support the State's governmental activities in the following governmental functions rather than reporting it as direct interest expense. The related borrowings were essential to

the creation or continuing existence of the programs they finance (dollars in thousands).

Governmental Activities:	
Primary, Secondary and Other Education	\$ 35,805
Higher Education Support	105,067

NOTE 16 NO COMMITMENT DEBT

The State of Ohio, by action of the General Assembly, created various financing authorities for the expressed purpose of making available to non-profit and, in some cases, for profit private entities lower cost sources of capital financing for facilities and projects found to be for a public purpose. Fees are assessed to recover related processing and application costs incurred.

The authorities' debt instruments represent limited obligations payable solely from payments made by the borrowing entities. Most of the bonds are secured by the property financed. Upon repayment of the bonds, ownership of acquired property transfers to the entity served by the bond issuance. This debt is not deemed to constitute debt of the State or a

pledge of the faith and credit of the State. Accordingly, these bonds are not reflected in the accompanying financial statements.

As of June 30, 2002, revenue bonds and notes outstanding that represent "no commitment" debt for the State are as follows (dollars in thousands):

Organization	Outstanding Amount
Ohio Department of Development:	
Ohio Housing Finance Agency	\$2,423,074
Ohio Enterprise Bond Program.....	109,115
Hospital Facilities Bonds.....	21,110
Total No Commitment Debt	<u>\$2,553,299</u>

NOTE 17 FUND DEFICITS, "OTHER" RESERVES, AND DESIGNATIONS

A. Fund Deficits

The following individual funds reported deficits that are reflected in the State's basic financial statements, as of June 30, 2002 (dollars in thousands):

<u>Primary Government:</u>	
Major Funds:	
Tuition Trust Authority Enterprise Fund.....	<u>(\$70,283)</u>
Nonmajor Governmental Funds:

B. "Other" Fund Balance Reserves and Designations

Details on the "Reserved for Other" account reported for the governmental funds, as of June 30, 2002, are presented in the table on the following page.

As of June 30, 2002, \$307 million and \$12.4 million of the General Fund's unreserved fund balance is designated for budget stabilization and compensated absences, respectively. The unreserved fund balance for nonmajor special revenue funds is designated for compensated absences in the amount of \$2.5 million, as of June 30, 2002.

NOTE 18 JOINT VENTURES AND RELATED ORGANIZATIONS

A. Joint Ventures

Great Lakes Protection Fund (GLPF)

The Great Lakes Protection Fund is an Illinois non-profit organization that was formed to further federal and state commitments to the restoration and maintenance of the Great Lakes Basin's ecosystem. The governors of seven of the eight states that border on the Great Lakes comprise the GLPF's membership. Under the GLPF's articles of incorporation, each state is required to make a financial contribution. Income earned on the contributions provides grants to projects that advance the goals of the Great Lakes Toxic Substances Control Agreement and the binational Great Lakes Quality Agreement.

Each governor nominates two individuals to the GLPF's board of directors who serve staggered two-year terms. All budgetary and financial decisions rest with the board except when restricted by the GLPF's articles of incorporation.

Annually, one-third of the GLPF's net earnings is allocated and paid to member states in proportion to their respective cash contributions to the GLPF. The allocation is based on the amount and period of time the states' contributions were invested. GLPF earnings distributions are to be used by the states to finance projects that are compatible with the GLPF's

objectives. Ohio has applied its distribution (approximately \$165 thousand for the year ended December 31, 2001) to the operations of its own protection program, known as the Lake Erie Protection Program, which is modeled after the GLPF.

Required contributions and contributions received from the states, which border the Great Lakes, as of December 31, 2001 (the GLPF's year-end), are as follows (dollars in thousands):

	Contribution Required	Contribution Received	Contribution Percentage
Michigan.....	\$25,000	\$25,000	30.9%
Indiana*	16,000	—	—
Illinois	15,000	15,000	18.4
Ohio.....	14,000	14,000	17.3
New York.....	12,000	12,000	14.8
Wisconsin.....	12,000	12,000	14.8
Minnesota.....	1,500	1,500	1.9
Pennsylvania...	1,500	1,500	1.9
Total.....	<u>\$97,000</u>	<u>\$81,000</u>	<u>100.0%</u>

*The State of Indiana has not yet elected to join the Great Lakes Protection Fund.

NOTE 18 JOINT VENTURES AND RELATED ORGANIZATIONS (Continued)

Summary financial information for the GLPF, for the fiscal year ended December 31, 2001, is as follows (dollars in thousands):

Cash and Investments	\$118,838
Other Assets	511
Total Assets	\$119,349
Total Liabilities	\$ 1,532
Total Fund Equity	117,817
Total Liabilities and Fund Equity ...	\$119,349
Total Revenues and Other Additions*	\$ (7,797)
Total Expenditures	(5,589)
Net Decrease in Fund Equity	\$ (13,386)

*Includes \$13,493 for unrealized loss on investments.

In the event of the Fund's dissolution, the State of Ohio would receive a portion of the Fund's assets equal to the lesser of the amount of such assets multiplied by the ratio of its required contribution to the required contributions of all member states, or the amount of its required contribution.

Local Community and Technical Colleges

The State's primary government has an ongoing financial responsibility for the funding of six local community colleges and eight technical colleges. With respect to the local community colleges, State of Ohio officials appoint three members of each college's respective nine-member board of trustees; county officials appoint the remaining six members. The governing boards of the technical colleges consist of either seven or nine trustees, of whom state officials appoint two and three members, respectively; the remaining members are appointed by the local school boards located in the respective technical college district.

The Ohio General Assembly appropriates moneys to these institutions from the General Fund to subsidize operations so that higher education can become more financially accessible to Ohio residents. The primary government also provides financing for the construction of these institutions' capital facilities by meeting the debt service requirements for the Higher Education Capital Facilities general obligation bonds issued by the Ohio Public Facilities Commission (OPFC) and Higher Education Facilities special obligation bonds, previously issued by the OPFC, for these purposes. The bonds provide funding for capital appropriations in the Special Revenue Fund, which are available to the local community and technical colleges for spending on capital construction.

Fiscal year 2002 expenses that were included in the "Higher Education Support" function under governmental activities in the Statement of Activities for state assistance to the local community and technical colleges are presented below (dollars in thousands).

	Operating Subsidies	Capital Subsidies	Total
Local Community Colleges:			
Cuyahoga Community College	\$ 45,228	\$15,874	\$ 61,102
Jefferson Community College	3,976	20	3,996

Total	\$195,343	\$32,991	\$228,334

Information for obtaining complete financial statements for each of the primary government's joint ventures is available from the Ohio Office of Budget and Management.

B. Related Organizations

Officials of the State's primary government appoint a voting majority of the governing boards of the Ohio Turnpike Commission, the Petroleum Underground Storage Tank Release Compensation Board, the Ohio Air Quality Development Authority, the Higher Education Facility Commission, and the Ohio Legal Assistance Foundation. However, the primary government's accountability for these organizations does not extend beyond making the appointments.

During fiscal year 2002, the State had the following related-party transactions with its related organizations:

The primary government distributed \$2.4 million in motor vehicle fuel excise tax collections from the Revenue Distribution Fund to the Ohio Turnpike Commission. Also, the primary government paid the Commission approximately \$2.2 million from the Highway

NOTE 18 JOINT VENTURES AND RELATED ORGANIZATIONS (Continued)

Operating Fund to cover some of its capital project costs.

Separate funds, established for the Petroleum Underground Storage Tank Release Compensation Board, the Ohio Air Quality Development Authority, and the Higher Education Facility Commission, were accounted for on the primary government's Central Accounting System. The primary purpose of the funds is to streamline payroll and other administrative disbursement processing for these organizations. The financial activities of the funds, which do not receive any fund-

ing support from the primary government, have been included in the agency funds.

From the Job, Family and Other Human Services Fund, the Public Defender's Office paid approximately \$673 thousand in compensation to the Ohio Legal Assistance Foundation for administrative services performed under contract for the distribution of state funding to nonprofit legal aid societies. Also, during fiscal year 2002, the Ohio Legal Assistance Foundation received approximately \$716 thousand in state assistance paid from the Job, Family and Other Human Services Fund.

NOTE 19 CONTINGENCIES AND COMMITMENTS

A. Litigation

The State, its units, and employees are parties to numerous legal proceedings, which normally occur in governmental operations.

Litigation pending in the Ohio Court of Claims contests the Ohio Department of Human Services (ODHS, now Ohio Department of Job and Family Services) former Medicaid financial eligibility rules for married couples when one spouse is living in a nursing facility and the other resides in the community. ODHS promulgated new eligibility rules effective January 1, 1996. ODHS appealed an order of the federal court directing it to provide notice to persons potentially affected by the former rules from 1990 through 1995, and the Court of Appeals ruled in favor of ODHS; plaintiff's petition for certiorari was not granted by the U.S. Supreme Court. As to the Court of Claims case, it is not possible to state the period (beyond the current fiscal year) during which necessary additional Medicaid expenditures would have to be made. Plaintiffs have estimated total additional Medicaid expenditures at \$600 million for the retroactive period and, based on current law, it is estimated that the State's share of those additional expenditures would be approximately \$240 million. The Court of Appeals has certified the class action and notice has been sent to the members of the class. Discovery is completed, and trial for liability only commenced January 13, 2003. No liability has been reported in the financial statements for this matter.

All other legal proceedings are not, in the opinion of management after consultation with the Attorney General, likely to have a material adverse effect on the State's financial position.

B. Federal Awards

The State of Ohio receives significant awards from the federal government in the form of grants and entitlements, including certain non-cash programs (which are not included in the basic financial statements). Receipt of grants is generally conditioned upon compliance with terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of resources for eligible purposes. Substantially all grants are subject to either the Federal Single Audit or to financial compliance audits by the grantor agencies of the federal government or their designees. Disallowances and sanctions as a result of these audits may become liabilities to the State.

As a result of the fiscal year 2001 State of Ohio Single Audit (completed in March 2002), \$29.6 million of federal expenditures are in question as not being appropriate under the terms of the respective grants. The amount of expenditures, which may be ultimately disallowed by the grantor, cannot be determined at this time, and consequently, no provision for any liability or adjustments for this matter has been recognized in the State's financial statements for the fiscal year ended June 30, 2002.

C. Tax Refund Claims

As of June 30, 2002, sales and use tax refund claims estimated in the amount of \$18.6 million were pending an official determination of the Tax Commissioner at the Ohio Department of Taxation. The claims arose from refund claims taxpayers filed during fiscal year 2002 for tax periods occurring in fiscal year 2002 and in prior years. No liability has been reported in the financial statements for this matter.

NOTE 19 CONTINGENCIES AND COMMITMENTS (Continued)

D. Construction Commitments

As of June 30, 2002, the Ohio Department of Transportation had total contractual commitments of approximately \$1.78 billion for highway construction projects. Funding for future projects is expected to be provided from federal, primary government, general obligation and revenue bonds, and local government sources in amounts of \$840.1 million, \$433.4 million, \$449 million, and \$56.6 million, respectively. As of June 30, 2002, other major non-highway construction commitments for the primary government's budgeted capital projects funds are as follows (dollars in thousands):

Mental Health/Mental Retardation	
Facilities Improvements.....	\$ 37,521
Parks and Recreation Improvements	25,212
Administrative Services	
Building Improvements	49,022
Youth Services Building Improvements.....	41,000
Adult Correctional Building Improvements ..	46,943
Highway Safety Building Improvements.....	7,732
Ohio Parks and Natural Resources.....	20,437
Total.....	<u>\$227,867</u>

E. Tobacco Settlement

In November 1998, the Attorneys General of 46 states, five U.S. territories, and the District of Columbia signed the Master Settlement Agreement (MSA) with the nation's largest tobacco manufacturers. This signaled the end of litigation brought by the Attorneys General against the manufacturers in 1996 for state health care expenses attributed to smoking-related claims. The remaining four states (Florida, Minnesota, Mississippi, and Texas) settled separately.

According to the MSA, participating tobacco manufacturers are required to adhere to a variety of new marketing and lobbying restrictions and provide payments to the states in perpetuity.

While Ohio's share of the total base payments to the states through 2025 will not change over time, the amount of the annual payment is subject to a number of adjustments, including an inflation adjustment and a volume adjustment. Some of these adjustments (for example, inflation) should contribute to an increase in the payments and others (for example, domestic cigarette sales volume) may decrease the payments. But the net effect of these adjustment factors on future payments is very uncertain, which makes it difficult to speculate on how different Ohio's real payments will be from the pre-adjusted base payment amounts.

In addition to the base payments, Ohio will receive payments from the Strategic Contribution Fund. The Strategic Contribution Fund was established to reward states that played leadership roles in the tobacco litigation and settlement negotiations. Allocations from the fund are based on a state's contribution to the litigation and settlement with the tobacco companies. These payments are also subject to the adjustment factors outlined in the MSA.

A schedule of pre-adjusted base payments and payments from the Strategic Contribution Fund for the State of Ohio in future years follows (dollars in thousands):

Year Ending June 30,	Pre-adjusted MSA Base Payments	Pre-adjusted Payments From the Strategic Contribution Fund	Total
2003	\$ 422,746	\$ —	\$ 422,746
2004	352,827	—	352,827

2006	352,827	—	352,827
2007	352,827	—	352,827
2008-2012 ..	1,799,147	119,750	1,918,897
2013-2017 ..	1,799,147	119,750	1,918,897
2018-2022 ..	2,016,011	—	2,016,011
2023-2025 ..	1,209,607	—	1,209,607
Total	<u>\$8,657,966</u>	<u>\$239,500</u>	<u>\$8,897,466</u>

During fiscal year 2002, Ohio received \$368.6 million, which was approximately \$50.2 million or 12 percent less than the pre-adjusted base payment for the year. For the last three fiscal years, with fiscal year 2000 being the first year when base payments were made to the states under the settlement, the State has received a total of about \$1.1 billion, which is approximately \$114.8 million or 9.5 percent less than the total of the pre-adjusted base payments established for the last three fiscal years.

The moneys provide funding for the construction of elementary and secondary school capital facilities, new programs for smoking cessation and other health-related purposes, biomedical research and technology, and assistance to the tobacco-growing areas in Ohio. Before the end of fiscal year 2002, the State transferred \$289.6 million in tobacco settlement revenues from the Special Revenue Fund to the General Fund to help make up for a shortfall in estimated tax revenues for fiscal year 2002. Also, the General Assembly has authorized the transfer of up to an additional \$285 million in tobacco settlement revenues, if needed to balance the fiscal year 2003 budget in the event of continued revenue shortfalls in the General Fund.

NOTE 20 RISK FINANCING

A. Workers' Compensation Benefits

The Ohio Workers' Compensation System, which the Bureau of Workers' Compensation and the Industrial Commission administer, is the exclusive provider of workers' compensation insurance to private and public employers in Ohio who are not self-insured. The Workers' Compensation Enterprise Fund provides benefits to employees for losses sustained from job-related injuries, disease, or death.

The "Benefits Payable" account balance reported in the Workers' Compensation Enterprise Fund, as of June 30, 2002, in the amount of approximately \$13.3 billion includes reserves for indemnity and medical claims, including actuarial estimates for both reported claims and claims incurred but not reported. The estimate for this liability is based on historical claims experience data and assumptions and projections as to future events, including claims frequency, severity, persistency, and inflationary trends for medical claim reserves. The compensation adjustment expenses liability, which is included in "Other Liabilities" in the amount of approximately \$1.6 billion, is an estimate of future expenses to be incurred in the settlement of claims. The estimate for this liability is based on projected claim-related expenses, estimated costs of the managed care Health Partnership Program, and the reserve for compensation.

Management of the Ohio Bureau of Workers' Compensation and the Industrial Commission of Ohio believes that the reported liability estimates are adequate; however, the ultimate liabilities may vary from amounts provided. While management uses available information to estimate the liabilities, future changes to the reserves for compensation and compensation adjustment expenses may be necessary based on claims experience and changing claims

frequency and severity conditions. The methods of making such estimates and for establishing the resulting liabilities are reviewed and updated quarterly based upon current circumstances. Any adjustments resulting from changes in estimates are recognized in the current period.

Benefits payable and the compensation adjustment expenses liability have been discounted at 5.8 percent to reflect the present value of future benefit payments. The undiscounted reserves for the benefits and compensation adjustment expenses totaled \$30.6 billion, as of June 30, 2002, and \$29.5 billion, as of June 30, 2001. For additional information, refer to the Fund's separate audited financial report, for the fiscal year ended June 30, 2002.

Changes in the balance of benefits payable and the compensation adjustment expenses liability for the Workers' Compensation Program during the past two fiscal years are presented in the table below.

B. Ohio Med Health Plan

Employees of the primary government have the option of participating in the Ohio Med Health Plan, which is a fully self-insured health benefit plan established July 1, 1989. Medical Mutual of Ohio administers the plan under a claims administration contract with the primary government.

When it is probable that a loss has occurred and the amount of the loss can be reasonably estimated, the primary government reports liabilities for the governmental and proprietary funds. Liabilities include an amount for claims that have been incurred but not reported. The plan's actuary calculates estimated claims liabilities based on prior claims data, employee enrollment figures, medical trends, and experience.

**Primary Government
Changes in Workers' Compensation Benefits Payable
and Compensation Adjustment Expenses Liability
Last Two Fiscal Years**
(dollars in millions)

	Fiscal Year 2002	Fiscal Year 2001
Benefits Payable and Compensation Adjustment Expenses Liability, as of July 1	\$14,112	\$13,638
Incurred Compensation and Compensation Adjustment Benefits	2,662	2,494
Incurred Compensation and Compensation Adjustment Benefit Payments	(2,158)	(2,020)
Change in Liability Due to Decrease in Discount Rate	272	—
Benefits Payable and Compensation Adjustment Expenses Liability, as of June 30	<u>\$14,888</u>	<u>\$14,112</u>

NOTE 20 RISK FINANCING (Continued)

Governmental and proprietary funds pay a share of the costs for claims settlement based on the number of employees opting for plan participation and the type of coverage selected by participants. The payments are reported in the Payroll Withholding and Fringe Benefits Agency Fund until such time that the primary government pays the accumulated resources to Medical Mutual of Ohio for claims settlement.

	Fiscal Year 2002	Fiscal Year 2001
Claims Liabilities, as of July 1	\$ 33,830	\$ 24,154
Incurred Claims	164,109	131,798
Claims Payments	<u>(151,464)</u>	<u>(122,122)</u>
Claims Liabilities, as of June 30	<u>\$ 46,475</u>	<u>\$ 33,830</u>

For governmental funds, the primary government recognizes claims as expenditures to the extent that the amounts are payable with expendable available financial resources. For governmental and business-type activities, claims are recognized in the Statement of Activities as expenses when incurred.

As of June 30, 2002, approximately \$33.8 million in assets was available in the Agency Fund to cover claims. Changes in the balance of Ohio Med health claims liabilities during the past two fiscal years are as follows (dollars in thousands):

As of June 30, 2002, the estimated claims liability exceeded the resources on deposit in the Payroll Withholding and Fringe Benefits Agency Fund for the payment of claims by approximately \$12.7 million, thereby, resulting in a funding deficit. The net claims liability, which is payable from expendable financial resources in the governmental funds, as of June 30, 2002, is reported as a fund liability in the governmental and proprietary funds.

C. Other Risk Financing Programs

The primary government has established programs to advance fund potential losses for vehicular liability and theft in office. The potential amount of loss arising from these risks, however, is not considered material in relation to the State's financial position.

NOTE 21 SUBSEQUENT EVENTS

A. Bond Issuances and Authorizations

Subsequent to June 30, 2002 (December 31, 2001 for the Ohio Water Development Authority), the State issued major debt as detailed in the table below and on the following page.

**Debt Issuances
Subsequent to June 30, 2002**
(dollars in thousands)

As specified in legislation passed prior to June 30, 2002, the General Assembly approved the following increases in bond issue authorizations that became effective after June 30, 2002 (dollars in thousands):

Common Schools Capital Facilities...	\$345,000
Higher Education Capital Facilities....	50,000
Infrastructure Improvements	240,000
Total	<u>\$635,000</u>

B. DeRolph Case — State School Funding Plan
Litigation, similar to that in other states, has been pending in Ohio courts since 1991 questioning the constitutionality of Ohio's system of school funding and compliance with the constitutional requirement that the State provide a "thorough and efficient system of common schools." On December 11, 2002, the Ohio Supreme Court, in a 4-3 decision on a motion to reconsider its own decision rendered in September 2001, concluded (as it had in its 1997 and 2000 opinions in that litigation) that the State did not comply with that requirement, even after again noting and crediting significant State steps in recent years. The Court directed the General Assembly "to enact a school-funding scheme that is thorough and efficient, as explained in [its prior decisions in 1997 and 2000], and the accompanying concurrences."

It is not possible at this time to state what or when the General Assembly's further responses will be, or what effect they or any related actions may have on the State's overall financial condition (particularly in the current biennium) or on specific state operations or functions.

C. Workers' Compensation — Intentional Tort Program Refunds

On September 24, 1992, the U.S. District Court issued an order prohibiting the Bureau of Workers' Compensation from disbursing assets for its Intentional Tort Program until such order was lifted or amended by the court. On August 26, 2002, the U.S. Sixth Circuit Appeals Court denied the contention that employers were entitled to reimbursement from the program for amounts paid by employers to settle intentional tort lawsuits that occurred between 1986 and 1991. The Bureau's management is developing a plan to refund the total assets of the Intentional Tort Program to the employers, which will be distributed after the period for appealing the decision to the U.S. Supreme Court has passed. As of June 30, 2002, the amount of total assets to be refunded to employers was \$66 million.

REQUIRED SUPPLEMENTARY INFORMATION

Pavement Network

The Ohio Department of Transportation conducts annual condition assessments of its Pavement Network. The State manages its pavement system by means of annual, visual inspections by trained pavement technicians. Technicians rate the pavement using a scale of 1 (minimum) to 100 (maximum) based on a Pavement Condition Rating (PCR). This rating examines items such as cracking, potholes, deterioration of the pavement, and other factors. It does not include a detailed analysis of the pavement's subsurface conditions.

Ohio accounts for its pavement network in two subsystems: *Priority*, which comprises interstate

highways, freeways, and multi-lane portions of the National Highway System, and *General*, which comprises two-lane routes outside of cities.

For the Priority Subsystem, it is the State's intention to maintain at least 75 percent of the pavement at a PCR level of at least 65, and to allow no more than 25 percent of the pavement to fall below a 65 PCR level. For the General Subsystem, it is the State's intention to maintain at least 75 percent of the pavement at a PCR level of at least 55, and to allow no more than 25 percent of the pavement to fall below a 55 PCR level.

Condition Assessment Data for the Pavement Network

Priority Subsystem:

		Calendar Year 2002	
	PCR	Lane-Miles	%
Excellent.....	85-100	6,753	55.74%
Good.....	75-84	2,688	22.19
Fair	65-74	2,162	17.85
Poor.....	Less than 65	511	4.22

(dollars in thousands)

	Fiscal Year 2002
Priority Subsystem:	
Estimated	\$251,216
Actual	319,518
General Subsystem:	
Estimated	\$110,956
Actual	151,978

Bridge Network

The Ohio Department of Transportation conducts annual inspections of all bridges in the State's Bridge Network. The inspections cover major structural items such as piers and abutments, and assign a general appraisal condition rating from 0 (minimum) to 9 (maximum) based on a composite measure of these major structural items.

It is the State's intention to maintain at least 85 percent of the square feet of deck area at a general appraisal condition rating level of at least five, and to allow no more than 15 percent of the number of square feet of deck area to fall below a general appraisal condition rating level of five.

Condition Assessment Data for the Bridge Network

	General Appraisal Rating	Calendar Year 2002	
		Square Feet of Deck Area	%
Excellent.....	7-9	43,395,068	53.56%

NONMAJOR SPECIAL REVENUE FUNDS

The **Special Revenue Funds** account for specific revenues that are legally restricted to expenditure for particular purposes.

The **Community and Economic Development Fund** accounts for programs administered by the Department of Development and other various state agencies, which were created to assure the efficient use of resources for the State's community and economic growth and development.

The **Health Fund** accounts for public health programs primarily administered by the Department of Health, which promotes the prevention and treatment of diseases and illnesses through technical assistance, health education, and research.

The **Mental Health and Retardation Fund** accounts for mental health care and retardation programs primarily administered by the Department of Mental Health and the Department of Mental Retardation and Developmental Disabilities, which provide assistance, services, and medical care to those individuals with mental health and developmental disability problems.

The **Highway Safety Fund** accounts for public safety programs primarily administered by the Department of Public Safety, which enforces traffic-related laws for the purpose of reducing accidents, deaths, injuries, and property damages on Ohio's highways.

The **Natural Resources Fund** accounts for environmental programs administered by the Department of Natural Resources, the Environmental Protection Agency, and other various state agencies, which promote, protect, and manage the State's natural resources and environment.

The **Wildlife and Waterways Safety Fund** accounts for programs administered by the Department of Natural Resources' Divisions of Wildlife and Watercraft, which promote, protect, and manage the State's wildlife and waterways and which provide technical assistance and education to the public.

The **Local Infrastructure and Transportation Improvements Fund** accounts for the Local Transportation Improvement Program administered by the Ohio Public Works Commission, which provides grants and loans to local governments for highway, road, and bridge construction.

The **Tobacco Settlement Fund** accounts for various health, education, economic, and law enforcement-related programs funded with moneys received under the Master Settlement Agreement with the nation's largest tobacco companies.

The **Clean Ohio Program Fund** accounts for programs that assist local communities in the clean-up and redevelopment of brownfield sites, the protection of green space, the preservation of farmland, the improvement of water quality, and the expansion of Ohio's network of recreational trails and greenways.

The **Higher Education Improvements Fund** accounts for bond proceeds that finance the construction of facilities for state-assisted higher education institutions.

NONMAJOR DEBT SERVICE FUNDS

The **Debt Service Funds** account for the resources accumulated and payments made for principal and interest on long-term debt of the governmental funds.

The **Coal Research/Development General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 15 of Article VIII, Ohio Constitution, to finance coal research and development projects.

The **Improvements General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2f of Article VIII, Ohio Constitution, to finance the improvement of higher education facilities, public schools, and natural resources.

The **Highway Improvements General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2g of Article VIII, Ohio Constitution, to finance the acquisition of rights-of-way and the construction and reconstruction of the State's highways and urban extensions.

The **Development General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2h of Article VIII, Ohio Constitution, to finance the construction, improvement, and development of higher education facilities, public schools, and natural resources.

The **Highway General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2i of Article VIII, Ohio Constitution, to finance the construction of the State's highways.

The **Public Improvements General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2i of Article VIII, Ohio Constitution, to finance the improvement of higher education facilities, water pollution controls, parks, and natural resources.

The **Vietnam Conflict Compensation General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2j of Article VIII, Ohio Constitution, to provide funding for the compensation to Ohioans that served in the military during the Vietnam Conflict.

The **Local Infrastructure Improvements General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2k of Article VIII, Ohio Constitution, to finance the cost of local government's public infrastructure improvement projects.

The **State Projects General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2l of Article VIII, Ohio Constitution, to finance capital improvements at state and local parks and other natural resources-related projects.

The **Highway Capital Improvements General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2m of Article VIII, Ohio Constitution, to finance capital improvements to the state highway system.

The **Higher Education Capital Facilities General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2n of Article VIII, Ohio Constitution, to finance the costs of capital facilities for state-supported and state-assisted institutions of higher education, including those for technical education.

The **Common Schools Capital Facilities General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2n of Article VIII, Ohio Constitution, to finance the costs of facilities for a system of common schools throughout Ohio.

The **Conservation Projects General Obligations Fund** accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2o of Article VIII, Ohio Constitution, to finance the purchase of additional “greenspace” land or interest in land devoted to natural areas, open spaces, and agriculture.

The **Economic Development Revenue Bonds Fund** accounts for the payment of principal and interest on revenue bonds issued to finance loans to individuals, corporations, and agencies within the State for economic development projects that create or retain jobs in the State.

The **Infrastructure Bank Revenue Bonds Fund** accounts for the payment of principal and interest on revenue bonds that have been authorized under the authority of Section 5531.10, Ohio Revised Code, to finance the construction of the Spring-Sandusky Highway Project in Columbus.

The **Higher Education Facilities Special Obligations Fund** accounts for the payment of principal and interest on special obligation bonds issued to finance the construction of higher education facilities.

The **Mental Health Facilities Special Obligations Fund** accounts for the payment of principal and interest on special obligation bonds is-

sued to finance the construction of mental health facilities.

The **Parks and Recreation Facilities Special Obligations Fund** accounts for the payment of principal and interest on special obligation bonds issued to finance the construction of parks and recreation projects and state park facilities.

The **School Building Program Special Obligations Fund** accounts for the payment of principal and interest on special obligation bonds that have been authorized under Section 2i of Article VIII, Ohio Constitution, to finance the costs of school buildings and classroom facilities used by public school districts for elementary and secondary education purposes.

The **Ohio Building Authority Special Obligations Fund** accounts for the payment of principal and interest on special obligation bonds issued to finance the construction of state office buildings and the costs of capital improvements for the Departments of Administrative Services, Youth Services, Transportation, Rehabilitation and Correction, Natural Resources, and Public Safety and for the Arts and Sports Facilities Commission.

The **Transportation Certificates of Participation Fund** accounts for the payment of certificate of participation-related obligations that financed the acquisition of the Department of Transportation’s Panhandle Rail Line Project.

NONMAJOR CAPITAL PROJECTS FUNDS

The **Capital Projects Funds** account for the acquisition and construction of major capital facilities other than those financed by proprietary funds and trust funds.

The **Infrastructure Bank Obligations Fund** accounts for bond proceeds that finance various highway construction projects sponsored by the Department of Transportation.

The **Mental Health/Mental Retardation Facilities Improvements Fund** accounts for bond proceeds that finance the construction of mental health/mental retardation facilities.

The **Parks and Recreation Improvements Fund** accounts for bond proceeds that finance the capital improvement of parks and recreation facilities.

The **Administrative Services Building Improvements Fund** accounts for bond proceeds that finance capital improvements for the Department of Administrative Services.

The **Youth Services Building Improvements Fund** accounts for bond proceeds that finance capital improvements for the Department of Youth Services.

The **Transportation Building Improvements Fund** accounts for bond proceeds that finance capital improvements for the Department of Transportation.

The **Adult Correctional Building Improvements Fund** accounts for bond proceeds that finance capital improvements for the Department of Rehabilitation and Correction.

The **Highway Safety Building Improvements Fund** accounts for bond proceeds that finance capital improvements for the Department of Public Safety.

The **Ohio Parks and Natural Resources Fund** accounts for bond proceeds that finance capital improvements for state and local parks and other natural resources-related projects.

The **Highway Capital Improvement Fund** accounts for bond proceeds that finance capital improvements to the state highway system.

AGENCY FUNDS

The **Agency Funds** account for resources the State holds in a purely custodial capacity (assets equal liabilities) for individuals, private organizations, or other governments.

The **Holding and Distribution Fund** accounts for assets held until such time that a determination has been made to refund amounts to the individuals, private organizations, or other governments.

The **Centralized Child Support Collections Fund** accounts for assets temporarily held for custodial parents.

The **Ohio Building Authority Fund** accounts for assets pending disbursement for capital maintenance and repairs on buildings owned by the Bureau of Workers' Compensation.

The **Tax Refunds Fund** accounts for assets held to liquidate the State's tax refund obligations.

The **Payroll Withholding and Fringe Benefits Fund** primarily accounts for assets held to liquidate the State's payroll withholding obligations.

The **Retirement Systems Fund** accounts for assets held in the custody of the Treasurer of State for the Public Employees Retirement System, Police and Firemen's Disability and Pension Fund, School Employees Retirement System, and State Teachers Retirement System. While legal custodian, the Treasurer of State does not manage or provide investment services to the foregoing retirement systems.

The **Other Fund** accounts for assets held for others, which are not accounted for in another agency fund.

NONMAJOR DISCRETELY PRESENTED COMPONENT UNIT FUNDS

The **Nonmajor Discretely Presented Component Unit Funds** account for the financial activities of the State of Ohio's component units, organizations that are legally separate from the State's primary government and for which the primary government is financially accountable. The Nonmajor Discretely Presented Component Unit Funds are presented in two separate reporting categories: **Governmental** and **Governmental Entities Engaged in Business-Type Activities – Colleges and Universities**.

Governmental

The **Arts and Sports Facilities Commission Fund** accounts for the revenues and expenditures associated with the Arts and Sports Facilities Commission's operations, including the construction of arts and sports facilities at the state and local level.

The **SchoolNet Commission Fund** accounts for the revenues and expenditures associated with the SchoolNet Commission's operations, including programs designed to assist Ohio's public schools acquire and maximize the use of educational technology.

Governmental Entities Engaged in Business-Type Activities – Colleges and Universities

The **Ohio University Fund** accounts for the operations of Ohio University located in Athens, Ohio.

The **Miami University Fund** accounts for the operations of Miami University located in Oxford, Ohio.

The **University of Akron Fund** accounts for the operations of the University of Akron.

The **Bowling Green State University Fund** accounts for the operations of Bowling Green State University.

The **Kent State University Fund** accounts for the operations of Kent State University.

The **University of Toledo Fund** accounts for the operations of the University of Toledo, including the University of Toledo Real Estate Corporation.

The **Cleveland State University Fund** accounts for the operations of Cleveland State University.

The **Youngstown State University Fund** accounts for the operations of Youngstown State University.

The **Wright State University Fund** accounts for the operations of Wright State University located in Dayton, Ohio.

The **Shawnee State University Fund** accounts for the operations of Shawnee State University located in Portsmouth, Ohio.

The **Central State University Fund** accounts for the operations of Central State University located in Wilberforce, Ohio.

The **Medical College of Ohio Fund** accounts for the operations of the Medical College of Ohio at Toledo and its hospital.

The **Terra State Community College Fund** accounts for the operations of Terra State Community College located in Fremont, Ohio.

The **Columbus State Community College Fund** accounts for the operations of Columbus State Community College and the Columbus State Community College Development Foundation, Inc.

The **Clark State Community College Fund** accounts for the operations of Clark State Community College located in Springfield, Ohio.

The **Edison State Community College Fund** accounts for the operations of Edison State Community College located in Piqua, Ohio.

The **Southern State Community College Fund** accounts for the operations of Southern State Community College located in Hillsboro, Ohio.

The **Washington State Community College Fund** accounts for the operations of Washington State Community College located in Marietta, Ohio.

The **Cincinnati State Community College Fund** accounts for the operations of Cincinnati State Community College.

The **Northwest State Community College Fund** accounts for the operations of Northwest State Community College located in Archbold, Ohio.

The **Owens State Community College Fund** accounts for the operations of Owens State Community College located in Toledo, Ohio.

Notes:

- (a) This table includes revenues for the General, special revenue, debt service, and capital projects funds.
- (b) For comparative purposes, revenue data for fiscal years 1993 through 2001 have not been restated for the effects of the following, which impacted governmental revenues shown for fiscal year 2002:
 - The implementation of the reporting provisions of GASB Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments*. Changes in reporting entity resulting from the reclassification of the Arts and Sports Facilities Commission and the SchoolNet Commission from governmental funds to discretely presented component unit funds.
 - The reclassification of the State's previously reported internal service funds to the General Fund.
 - The reclassification of the State's previously reported Unclaimed Funds Expendable Trust Fund to the General Fund.
- (c) For comparative purposes, the revenue data for fiscal year 2000 have been restated for the reclassification of the School Facilities Commission discretely presented component unit from the Special Revenue Fund.
- (d) For comparative purposes, the "Licenses, Permits, and Fees" revenue for fiscal years 1993 through 1999 have been restated to reflect hospital assessments. Previously, this revenue had been included in "Other" revenue.
- (e) For fiscal years 1995 through 2002, federal government revenue includes the effects of recognizing the distribution of food stamp benefits as revenue, in accordance with the reporting requirements of GASB Statement No. 24, *Accounting and Financial Reporting for Certain Grants and Other Financial Assistance*. Federal government revenue data for fiscal years 1993 and 1994, however, have not been restated for the effect of this change in accounting principle.
- (f) For fiscal years 2001 and 2002, federal government revenue includes the effects of recognizing nonexchange revenue, in accordance with the reporting requirements of GASB Statement No. 33, *Accounting and Financial Reporting for Nonexchange Transactions*. Federal government revenue data for fiscal years 1993 through 2000, however, have not been restated for the effect of this change in accounting principle.
- (g) For fiscal years 1993 through 1996, investment income had been included in "Other" revenue.

Notes:

- (a) Includes general and special obligation bonds for which debt service payments have been made from the following combining funds in the Debt Service Fund and Capital Projects Fund:

Debt Service Fund

Coal Research/Development General Obligations
Improvements General Obligations
Highway Improvements General Obligations
Development General Obligations
Highway General Obligations
Public Improvements General Obligations
Vietnam Conflict Compensation General Obligations
Local Infrastructure Improvements General Obligations
State Projects General Obligations
Highway Capital Improvements General Obligations
Higher Education Capital Facilities General Obligations

Common Schools Capital Facilities General Obligations
Conservation Projects General Obligations
Higher Education Facilities Special Obligations
Mental Health Facilities Special Obligations
Parks and Recreation Facilities Special Obligations
School Building Program Special Obligations
Ohio Building Authority Special Obligations

Capital Projects Fund

Mental Health/Mental Retardation Facilities Improvements
Parks and Recreation Improvements

- (b) This table includes revenues and expenditures for the General, special revenue, debt service, and capital projects funds.
- (c) Revenue and expenditures for fiscal years 1995 through 2002 include the effects of recognizing the distribution of food stamp benefits as revenues and expenditures, in accordance with the reporting requirements of GASB Statement No. 24, *Accounting and Financial Reporting for Certain Grants and Other Financial Assistance*. Revenue and expenditure data presented for fiscal years 1993 and 1994, however, have not been restated for the effect of this change in accounting principle.
- (d) For comparative purposes, revenue and expenditure data for fiscal years 1993 through 2001 have not been restated for the effects of the following, which impacted governmental revenues and expenditures shown for fiscal year 2002:
- The implementation of the reporting provisions of GASB Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments*.
Changes in reporting entity resulting from the reclassification of the Arts and Sports Facilities Commission and the SchoolNet Commission from governmental funds to discretely presented component unit funds.
The reclassification of the State's previously reported internal service funds to the General Fund.
The reclassification of the State's previously reported Unclaimed Funds Expendable Trust Fund to the General Fund.
- (e) For comparative purposes, the revenue and expenditure data for fiscal year 2000 have been restated for the reclassification of the School Facilities Commission discretely presented component unit from the Special Revenue Fund.
